PROFESSIONAL SUMMARY

Backend engineer with 2 years of experience building scalable APIs and microservices. I've worked across Python and Node.js stacks, focusing on database optimization and API design. I'm driven by solving real problems efficiently and enjoy collaborating with frontend teams to ship features that work smoothly. Outside of code, I contribute to open source and spend time learning about system design patterns.

WORK EXPERIENCE

Software Engineer

TechVault Solutions

techvault.io

Edinburgh, United Kingdom

June 2023 - Present

Developed and maintained REST APIs using Python Flask framework serving 150k+ monthly requests with sub-200ms response times

Implemented database indexing strategies and query optimization that reduced average query time by 40%

Integrated payment processing system using Stripe API, handling subscription management for 2000+ customers

Collaborated with frontend team to design API schemas and documented endpoints using OpenAPI specification

Junior Backend Developer

DataFlow Systems

dataflow.co

Edinburgh, United Kingdom

March 2022 - May 2023

Built microservices using Node.js and Express for data processing pipelines handling real-time analytics

Designed and implemented PostgreSQL schemas for three major features, mentored by senior engineer on normalization best practices

Created automated backup and recovery procedures reducing data loss risk and downtime by implementing daily incremental backups

Wrote comprehensive unit tests and integration tests using Jest and Mocha, achieving 78% code coverage across core modules

Graduate Software Developer

CloudBase Technology

www.cloudbase.com

Edinburgh, United Kingdom

September 2021 - February 2022

Contributed to backend codebase using Python and Django, fixing bugs and implementing minor features under supervision

Participated in code reviews and learned version control workflows using Git and GitHub for team collaboration

Deployed applications to AWS EC2 instances and learned basic DevOps practices including monitoring and logging

Completed onboarding training on company architecture, databases, and documentation standards

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2021

Grade: 2:1 (Upper Second Class Honours)

Relevant Coursework: Data Structures and Algorithms, Database Systems, Web Application Development, Software Engineering

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Bash

Frameworks and Libraries: Flask, Express.js, Django, SQLAlchemy

Databases: PostgreSQL, MySQL, Redis

Tools and Platforms: Git, Docker, AWS (EC2, S3, RDS), Linux, Postman, GitHub Actions

Concepts: RESTful APIs, Microservices Architecture, Database Design, ORM, CI/CD Pipelines

GITHUB REPOSITORIES

flask-user-api - RESTful API for user management system built with Flask and PostgreSQL

node-task-scheduler - Background job processor using Node.js and Bull queue

postgres-migration-tool - CLI tool for managing database schema migrations written in Python

expense-tracker-api - Personal project tracking expenses with Flask and JWT authentication

CERTIFICATIONS

AWS Certified Cloud Practitioner (2023)
