PROFESSIONAL SUMMARY

I'm a BI Analyst with 10 years of experience building data solutions that help businesses make faster decisions. I've spent the last several years working with large enterprise datasets and translating complex business requirements into functional dashboards and reports. I'm most comfortable with SQL and Python, and I enjoy the problem-solving side of analytics work where I get to dig into messy data and find patterns that actually matter.

WORK EXPERIENCE

Senior BI Analyst

DataFlow Solutions Ltd

www.dataflowsolutions.io

Manchester, United Kingdom

March 2021 - Present

Designed and deployed 15+ enterprise dashboards using Tableau and Power BI serving 200+ internal users across finance and operations teams, reducing report generation time from 4 hours to 15 minutes daily.

Built automated data pipelines in Python and SQL that integrated data from 8 different source systems, improving data freshness from weekly to real-time and eliminating 30 manual reconciliation tasks per month.

Mentored 3 junior analysts on advanced SQL techniques and data modeling best practices, with 2 of them promoted to senior analyst roles within 18 months.

Worked directly with CFO and VP of Operations to define KPI frameworks and built a consolidated executive dashboard that became the primary tool for monthly board reporting.

BI Analyst

TechVision Consulting

www.techvisionconsulting.net

Manchester, United Kingdom

July 2017 - February 2021

Developed complex SQL queries and stored procedures to extract and transform data from Oracle and SQL Server databases, supporting 12 concurrent client projects with data refresh cycles ranging from daily to real-time.

Created over 40 Tableau visualizations and dashboards for retail and manufacturing clients, directly supporting business decisions around inventory optimization and supply chain efficiency.

Led the migration of legacy Access databases to a centralized SQL Server data warehouse, documenting all business logic and training 5 client teams on new system navigation.

Collaborated with business analysts and developers to gather requirements, scope deliverables, and deliver BI solutions on time and within budget for 8 enterprise clients.

BI Developer

Northern Analytics Group

www.northernanalytics.co

Leeds, United Kingdom

September 2014 - June 2017

Created and maintained SSRS reports and dashboards for finance and HR departments, including payroll analytics, headcount forecasting, and departmental cost allocation reports used by 150+ employees.

Optimized slow-running SQL queries by redesigning table structures and implementing appropriate indexing strategies, improving dashboard load times by an average of 65%.

Built ETL processes using SSIS to automate the weekly consolidation of data from 6 regional offices into a central reporting database, eliminating overnight manual data consolidation work.

Documented all reports and data models with business process maps and data lineage diagrams, creating a knowledge base that reduced onboarding time for new team members from 6 weeks to 2 weeks.

EDUCATION

Bachelor of Science in Business Information Technology

University of Manchester

Manchester, United Kingdom

Graduated: June 2014

SKILLS

Technical Tools: Tableau, Power BI, SQL Server, Oracle, MySQL, SSRS, SSIS, Python, VBA

Database Management: Data modeling, ETL development, query optimization, data warehouse design, relational databases

Data Analysis: Statistical analysis, trend analysis, forecasting, data quality assessment, root cause analysis

Programming: Python scripting, SQL stored procedures, T-SQL, PL/SQL, VBA macros

Cloud Platforms: Azure (basic), AWS (basic)

Other: Requirements gathering, stakeholder communication, documentation, Agile methodology, Excel advanced functions
