PROFESSIONAL SUMMARY

Full Stack Engineer with 1 year of professional experience building web applications using React and Node.js. I started my career at a fast-paced fintech startup where I learned to write clean, testable code while shipping features to production. I'm passionate about solving real problems with technology and enjoy the challenge of debugging complex issues. Currently based in Edinburgh and looking for opportunities to grow my skills while contributing meaningfully to a team.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3, Redux, Material-UI

Backend: Node.js, Express, Python, RESTful APIs

Databases: PostgreSQL, MongoDB, Firebase

Tools and Platforms: Git, Docker, AWS S3, GitHub, Visual Studio Code, Postman

Testing: Jest, React Testing Library

Other: Agile methodologies, CI/CD pipelines

WORK EXPERIENCE

Junior Full Stack Developer

TechVenture Solutions Ltd

www.techventure.io

Edinburgh, United Kingdom

March 2024 - Present

Developed and maintained React components for customer-facing features in our SaaS platform, resulting in improved user engagement metrics.

Built REST APIs using Node.js and Express to support mobile and web applications, handling authentication and data validation.

Collaborated with product and design teams to implement new features from wireframes to production deployment.

Participated in code reviews and pair programming sessions, learning best practices from senior engineers and contributing meaningful feedback.

Software Developer Intern

DataFlow Systems

www.dataflowsystems.co

Edinburgh, United Kingdom

September 2023 - February 2024

Created React dashboard components to visualize real-time data analytics for enterprise clients.

Assisted in building backend services using Node.js and PostgreSQL for processing CSV imports and generating reports.

Fixed bugs across the codebase and wrote unit tests using Jest to improve code coverage from 45% to 62%.

Learned Git workflows and participated in daily standups to understand how distributed teams coordinate development.

Junior Developer

Edinburgh Digital Agency

www.edinburghdigital.net

Edinburgh, United Kingdom

June 2023 - August 2023

Built responsive static websites using HTML, CSS, and vanilla JavaScript for small business clients.

Deployed websites to AWS S3 and configured CloudFront for CDN distribution and caching.

Assisted senior developers in debugging production issues and implementing hotfixes for client websites.

Created technical documentation for deployed projects to help the team understand deployment processes and configurations.

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2023

GITHUB REPOSITORIES

github.com/jmorrison92/expense-tracker - Full stack MERN application with user authentication and expense categorization

github.com/jmorrison92/weather-dashboard - React weather app consuming OpenWeather API with location-based forecasts

github.com/jmorrison92/todo-api - REST API built with Express and PostgreSQL, includes comprehensive test suite

github.com/jmorrison92/portfolio-website - Personal portfolio website built with React and styled with CSS Grid
