PROFESSIONAL SUMMARY

Full Stack Engineer with 2 years of hands-on experience building web applications using modern JavaScript frameworks and cloud technologies. I've worked across the entire stack from database design to responsive frontends, with a particular interest in performance optimization and clean code practices. I'm looking to deepen my expertise in system architecture and contribute to products that solve real problems for users.

WORK EXPERIENCE

Junior Full Stack Developer

TechVision Solutions

techvision.io

Bristol, United Kingdom

March 2023 - Present

Developed and maintained 5+ customer-facing web applications using React and Node.js serving approximately 50,000 monthly active users.

Implemented REST APIs and PostgreSQL database schemas for e-commerce platform, reducing page load times by 35% through query optimization.

Collaborated with product team to deliver new features across full stack, resulting in 2 major releases with zero critical bugs in production.

Participated in code reviews and pair programming sessions, learning established patterns and contributing improvements to shared component library.

Mid-Level Software Developer

CloudBridge Digital

cloudbridge.co

Bristol, United Kingdom

July 2022 - February 2023

Built responsive frontend interfaces using React and TypeScript for internal and client-facing dashboards processing real-time data.

Created microservices using Express.js and deployed to AWS Lambda, managing infrastructure as code with Terraform.

Debugged and resolved production issues across full stack, achieving 99.2% uptime for critical services.

Mentored 1 intern on JavaScript fundamentals and full stack development best practices throughout their 3-month placement.

Junior Developer

Digital Forge Ltd

digitalforge.net

Bristol, United Kingdom

September 2021 - June 2022

Built static websites and landing pages using HTML, CSS, and vanilla JavaScript for 15+ clients across various industries.

Assisted senior developers in migrating legacy PHP codebase to modern Node.js stack, converting 8 key modules over 4 months.

Improved website accessibility by implementing WCAG 2.1 standards across 6 client projects, resulting in improved search rankings.

Maintained and updated client websites post-launch, managing bug fixes and feature requests through GitHub Issues.

EDUCATION

BSc Computer Science (Second Class Upper Division)

University of Bristol

Bristol, United Kingdom

2018 - 2021

Relevant coursework: Full Stack Web Development, Database Systems, Object-Oriented Programming, Software Engineering Principles, Data Structures and Algorithms

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Next.js, Redux, Material-UI, Tailwind CSS, responsive design

Backend: Node.js, Express.js, REST APIs, authentication and authorization, server management

Databases: PostgreSQL, MongoDB, database design and optimization

Cloud and DevOps: AWS (EC2, Lambda, S3, RDS), Docker, Terraform, CI/CD pipelines, Git version control

Tools and Platforms: VS Code, GitHub, GitLab, Jira, Postman, Chrome DevTools

GITHUB REPOSITORIES

jmfletcher92/task-management-app - Full stack task management application built with React and Node.js featuring real-time updates and user authentication.

jmfletcher92/weather-dashboard - React weather application consuming OpenWeather API with location search, forecast display, and local storage preferences.

jmfletcher92/ecommerce-api - RESTful API built with Express and PostgreSQL for fictional e-commerce platform with complete CRUD operations and JWT authentication.

jmfletcher92/portfolio-website - Personal portfolio website built with Next.js and Tailwind CSS showcasing projects and technical skills with SEO optimization.
