PROFESSIONAL SUMMARY

I'm a data scientist with 8 years of experience building machine learning solutions that deliver measurable business impact. I've spent the last five years focused on developing production-grade models for predictive analytics and customer intelligence. My background spans financial services, retail, and healthcare sectors. I enjoy working with complex datasets and translating technical findings into actionable insights for non-technical stakeholders.

WORK EXPERIENCE

Senior Data Scientist

DataVault Solutions

Birmingham, United Kingdom

www.datavaultsolutions.io

January 2022 - Present

Led a team of three junior data scientists in developing machine learning models for customer churn prediction, reducing customer attrition by 12 percent across the portfolio. Implemented end-to-end MLOps pipeline using Docker and Kubernetes, reducing model deployment time from 2 weeks to 3 days. Conducted statistical analysis on A/B testing results for product teams, delivering recommendations that influenced roadmap decisions for two major features. Mentored junior staff on best practices in data validation, feature engineering, and model interpretability using SHAP values.

Data Scientist

Meridian Financial Group

Birmingham, United Kingdom

www.meridianfinancial.co.uk

June 2019 - December 2021

Built predictive credit risk models using gradient boosting and neural networks that improved loan approval accuracy by 15 percent while maintaining compliance requirements. Developed automated reporting dashboards in Tableau connected to SQL databases, replacing manual processes that consumed 40 hours per week. Managed cross-functional projects with compliance, risk, and operations teams to implement model governance frameworks and documentation standards. Performed deep-dive analysis on portfolio performance metrics, identifying three areas of operational inefficiency that yielded cost savings of 180,000 pounds annually.

Junior Data Scientist

RetailConnect Analytics

Manchester, United Kingdom

www.retailconnect.net

August 2016 - May 2019

Developed recommendation algorithms for e-commerce platform using collaborative filtering and content-based approaches, increasing average order value by 8 percent. Cleaned and prepared large transactional datasets from multiple sources using Python and Spark, handling data quality issues that affected 200,000 daily records. Created

data visualizations and weekly reports for marketing teams to track campaign performance and customer segmentation. Contributed to the adoption of Python-based data science workflows across the department, transitioning the team from manual Excel processes.

EDUCATION

Master of Science in Computer Science with specialisation in Machine Learning

University of Birmingham

Graduated: September 2016

Dissertation: Anomaly Detection in Time Series Data Using Isolation Forests

Bachelor of Science in Mathematics with Statistics

University of Warwick

Graduated: June 2014

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Scala

Machine Learning: XGBoost, LightGBM, scikit-learn, TensorFlow, PyTorch, Keras

Data Analysis and Visualisation: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI

Databases: PostgreSQL, MySQL, MongoDB, Snowflake

Cloud Platforms: AWS (SageMaker, EC2, S3), Google Cloud Platform (BigQuery, Vertex AI)

Big Data Technologies: Apache Spark, Hadoop

DevOps and Deployment: Docker, Kubernetes, Git, Jenkins, CI/CD pipelines

Statistical Methods: Hypothesis testing, regression analysis, time series forecasting, A/B testing

Model Evaluation: Cross-validation, hyperparameter tuning, ROC-AUC, precision-recall analysis

CERTIFICATIONS

AWS Certified Machine Learning Specialist

Issued: March 2021

Google Cloud Professional Data Engineer

Issued: July 2019
