PROFESSIONAL SUMMARY

Full Stack Engineer with 2 years of hands-on experience building web applications using modern JavaScript frameworks and backend technologies. I've worked across startups and established tech companies, getting comfortable with end-to-end development from database design through to frontend implementation. I'm particularly drawn to solving real user problems and enjoy the collaborative process of shipping features that people actually use. Always keen to learn from more experienced engineers and contribute meaningfully to team projects.

WORK EXPERIENCE

Junior Full Stack Developer

TechVision Labs

Leeds, United Kingdom

www.techvisionlabs.io

June 2023 - Present

Developed and maintained 5 customer-facing web applications using React and Node.js, handling both frontend and backend responsibilities across the full stack.

Built RESTful APIs using Express.js and MongoDB to support mobile and web clients, ensuring data consistency and implementing proper error handling.

Collaborated with product and design teams to translate wireframes into functional components, participating in code reviews and contributing to architectural decisions.

Resolved production issues and bugs through debugging and root cause analysis, reducing average incident resolution time by 40 percent in Q2 2024.

Junior Web Developer

Digital Bridge Solutions

Manchester, United Kingdom

www.digitalbridgesolutions.co.uk

January 2023 - May 2023

Created responsive user interfaces using HTML, CSS, and Vue.js for 3 client projects, ensuring cross-browser compatibility and accessibility standards compliance.

Assisted senior developers in building backend services with Python and PostgreSQL, learning database optimization and query performance tuning.

Implemented user authentication and authorization systems using JWT tokens, securing sensitive application features and user data.

Participated in sprint planning and daily standups, delivering features on time and communicating progress to both technical and non-technical stakeholders.

Apprentice Developer

StartupHub

Leeds, United Kingdom

www.startuphub.net

August 2022 - December 2022

Built static websites and basic web applications using HTML, CSS, and vanilla JavaScript for local business clients.

Learned version control with Git and collaborated with other developers using GitHub, understanding branching strategies and pull request workflows.

Debugged JavaScript issues in production environments and implemented fixes, improving website performance and user experience.

Maintained documentation for internal tools and processes, helping onboard new apprentices and ensuring knowledge retention across the team.

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

Graduated June 2022

Grade: 2:1

Relevant coursework: Web Application Development, Database Systems, Software Engineering, Data Structures and Algorithms

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend Frameworks: React, Vue.js

Backend Technologies: Node.js, Express.js, Python

Databases: MongoDB, PostgreSQL

Tools and Platforms: Git, Docker, REST APIs, VS Code, Linux command line

Other: JWT authentication, responsive design, agile methodologies, debugging and troubleshooting
