PROFESSIONAL SUMMARY

Data analyst with 7 years of experience transforming complex datasets into actionable business intelligence for financial services and retail sectors. I've spent the last 4 years at senior level leading analytics projects and mentoring junior team members. I'm most interested in problems involving time-series forecasting and customer behaviour analysis, having built several predictive models that directly influenced strategic decisions. I'm comfortable with Python, SQL, and Tableau, and I enjoy the process of explaining technical findings to non-technical stakeholders.

WORK EXPERIENCE

Senior Data Analyst

DataVault Analytics Ltd

datavault-analytics.io

Oxford, United Kingdom

March 2021 - Present

Led analytics initiatives for 8 major clients across finance and e-commerce, delivering monthly reporting dashboards and quarterly business reviews that informed budget allocation decisions totalling £2.5M.

Developed and maintained 15+ Python-based ETL pipelines processing 500GB of data weekly from multiple sources including APIs, databases, and flat files, reducing manual processing time by 18 hours per week.

Mentored 3 junior analysts on SQL optimisation, statistical methods, and data visualisation best practices, with 2 subsequently promoted to mid-level roles within 18 months.

Implemented a customer cohort analysis framework in Tableau identifying high-value retention segments, contributing to a 12% reduction in churn for our largest retail client.

Data Analyst

Insight Solutions plc

insightsolutions.co.uk

London, United Kingdom

June 2018 - February 2021

Designed and executed A/B testing programme for e-commerce platform testing 45+ hypotheses annually, with findings implemented by product team resulting in 8% uplift in conversion rates.

Built automated reporting suite using Python and SQL Server, consolidating data from 6 disparate systems and reducing report generation time from 12 hours to 1.5 hours per cycle.

Conducted exploratory data analysis on customer transaction data leading to segmentation model identifying 5 distinct user personas used for targeted marketing campaigns reaching 2.3M customers.

Collaborated with finance team to create variance analysis dashboard tracking P&L; performance across 12 business units, enabling faster identification of budget anomalies.

Junior Data Analyst

Market Research Group

marketresearchgroup.net

Oxford, United Kingdom

August 2016 - May 2018

Performed statistical analysis on survey data from 30,000+ respondents using SPSS and Excel, producing insights reports for clients in telecommunications, utilities, and FMCG sectors.

Supported senior analysts in building Qlik dashboards for executive reporting on market trends and competitor activity, with 15 dashboards deployed across client base.

Conducted data quality validation and cleansing on raw data sources, identifying and documenting data integrity issues that improved upstream system configuration.

Created documentation and training materials for new data analysis tools, delivering 5 training sessions to team members and helping establish standard analytical procedures.

EDUCATION

BSc (Hons) Computer Science with Statistics

University of Manchester

Manchester, United Kingdom

Graduated: June 2016

Grade: Upper Second Class Honours (2:1)

TECHNICAL SKILLS

Languages and Databases: Python, SQL (T-SQL, PostgreSQL, MySQL), R, VBA

Data Visualisation: Tableau, Power BI, Matplotlib, Seaborn, Plotly

ETL and Data Tools: Apache Airflow, Talend, Excel (advanced), SPSS, Qlik

Cloud Platforms: AWS (S3, RDS, EC2), Azure Data Factory, Google BigQuery

Statistical Methods: Regression analysis, hypothesis testing, time-series forecasting, clustering, A/B testing

Additional Skills: Git version control, Pandas, NumPy, scikit-learn, JIRA, Agile methodologies

GITHUB REPOSITORIES

github.com/mjpatterson/customer-churn-predictor

Binary classification model using XGBoost predicting customer churn with 87% accuracy, includes data preprocessing and feature engineering pipeline.

github.com/mjpatterson/retail-sales-forecasting

ARIMA and Prophet implementations for multi-location retail forecasting with seasonal decomposition and 90-day ahead predictions.

github.com/mjpatterson/etl-pipeline-framework

Reusable Python ETL framework with error handling, logging, and incremental data processing for SQL databases.

github.com/mjpatterson/tableau-data-connector

Custom Python script for automating data extraction from company APIs and pushing to Tableau Server for automated refresh cycles.
