PROFESSIONAL SUMMARY

Senior Staff Engineer with 6 years of progressive experience in cloud infrastructure, distributed systems, and backend development. Proven track record of architecting scalable solutions that support millions of transactions daily. Strong mentorship abilities with experience leading technical initiatives across cross-functional teams. Passionate about solving complex engineering challenges and building high-performing engineering cultures.

WORK EXPERIENCE

Staff Engineer - Platform Infrastructure

Nexus Cloud Systems, Oxford

nexuscloud.io

May 2022 - Present

Designed and implemented microservices architecture serving 2.5M daily active users, reducing latency by 35% and improving system reliability to 99.99% uptime.

Led migration of monolithic application to Kubernetes-based infrastructure, mentoring 4 junior engineers through the transition and establishing best practices for containerization.

Architected multi-region failover strategy and disaster recovery protocols, conducting quarterly drills and ensuring RPO of less than 15 minutes.

Established observability standards across the platform using Prometheus and Grafana, reducing mean time to resolution for incidents by 60%.

Senior Software Engineer - Backend Systems

TechVault Solutions Ltd

techvault.co.net

August 2019 - April 2022

London, United Kingdom

Developed and maintained core payment processing service handling 50M+ monthly transactions using Go and PostgreSQL, achieving 99.95% availability.

Implemented event-driven architecture using Apache Kafka, enabling real-time data synchronization across 8 downstream services and reducing data consistency issues by 80%.

Optimized database query performance through indexing strategies and query refactoring, decreasing average API response time from 450ms to 120ms.

Mentored 3 junior engineers and conducted weekly tech talks on distributed systems design, contributing to team skill development and knowledge sharing.

Software Engineer - Backend Development

Cisco Systems Ltd

cisco.com

Oxford, United Kingdom

June 2018 - July 2019

Built REST APIs for network management platform using Python and Django, supporting enterprise clients managing thousands of network devices.

Improved CI/CD pipeline efficiency by implementing automated testing frameworks and code quality checks, reducing deployment time from 45 minutes to 12 minutes.

Collaborated with product and infrastructure teams to design and deploy features across staging and production environments following agile methodologies.

Contributed to open source projects and maintained internal libraries, receiving recognition for code quality and documentation standards.

EDUCATION

University of Oxford

Master of Science in Computer Science

Graduation: June 2018

University of Bristol

Bachelor of Science in Computer Science (First Class Honours)

Graduation: June 2016

TECHNICAL SKILLS

Languages: Go, Python, Java, SQL, JavaScript, Bash

Cloud Platforms: AWS (EC2, RDS, S3, Lambda), Google Cloud Platform, Azure

Databases: PostgreSQL, MongoDB, Redis, DynamoDB

Tools and Frameworks: Kubernetes, Docker, Apache Kafka, Apache Spark, Django, FastAPI

DevOps: Terraform, Jenkins, GitHub Actions, Prometheus, Grafana, ELK Stack

Version Control: Git, GitHub, GitLab

Methodologies: Microservices Architecture, Event-Driven Architecture, System Design, Agile/Scrum

PUBLIC REPOSITORIES

github.com/jwhitmore87/k8s-deployment-manager - Kubernetes deployment automation tool in Go

github.com/jwhitmore87/distributed-cache-system - In-memory distributed caching layer using Redis

github.com/jwhitmore87/event-streaming-toolkit - Apache Kafka client libraries and utilities for Python

github.com/jwhitmore87/api-gateway-proxy - Lightweight API gateway written in Go with rate limiting and authentication
