PROFESSIONAL SUMMARY

Passionate Research Engineer with 2 years of experience in machine learning infrastructure and distributed systems. Strong background in Python and cloud technologies with a focus on developing scalable solutions for data processing pipelines. Eager to contribute to innovative research projects and expand expertise in emerging technologies while supporting senior researchers and engineers.

WORK EXPERIENCE

Principal Research Scientist

Quantum Analytics Labs

<https://quantumanalyticslabs.io>

Stockholm, Sweden

March 2024 - Present

Directed research initiatives across 12 cross-functional engineering teams spanning machine learning, infrastructure, and data science divisions

Led quarterly strategic planning sessions with C-level executives resulting in 45 million SEK budget allocations for research programs

Established company-wide machine learning standards and governance frameworks affecting 200+ engineers across European offices

Architected next-generation distributed training platform processing 500TB+ datasets daily with 99.9% uptime SLA

Senior ML Infrastructure Engineer

DataFlow Innovations

<https://dataflow-innovations.net>

Stockholm, Sweden

November 2023 - February 2024

Designed and implemented automated model deployment pipeline reducing deployment time by 60%

Mentored team of 8 junior engineers on Kubernetes best practices and containerization strategies

Optimized PyTorch distributed training reducing compute costs by 35% through custom gradient compression algorithms

Established monitoring and observability framework using Prometheus and ELK stack for production ML systems

Junior Research Engineer

King's College London

<https://www.kcl.ac.uk>

Stockholm Office, Sweden

July 2022 - October 2023

Conducted research on transformer model optimization techniques resulting in 3 published conference papers

Implemented benchmarking suite for neural network architectures using TensorFlow and Ray framework
Developed Python utilities for dataset preprocessing and augmentation serving 5 concurrent research projects
Contributed to open-source computer vision library with 12 merged pull requests and 800+ GitHub stars

EDUCATION

Master of Science in Computer Science
KTH Royal Institute of Technology
Stockholm, Sweden
Graduated: June 2022

GPA: 3.8/4.0

Specialization: Machine Learning and Distributed Systems
Thesis: Optimization Techniques for Large-Scale Transformer Models

Bachelor of Science in Computer Science
Uppsala University
Uppsala, Sweden
Graduated: June 2020

GPA: 3.7/4.0

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, SQL, Bash
Machine Learning: PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers
Data Engineering: Apache Spark, Pandas, NumPy, Dask
Cloud Platforms: AWS (EC2, S3, SageMaker), Google Cloud Platform, Azure
DevOps & Tools: Docker, Kubernetes, Git, Jenkins, GitHub Actions
Databases: PostgreSQL, MongoDB, Redis, DynamoDB
Other: Ray, Jupyter Notebooks, Linux, REST APIs, gRPC

GITHUB REPOSITORIES

eriklundgren/transformer-optimization-toolkit - Comprehensive toolkit for optimizing transformer model inference with quantization and pruning techniques. 450 stars, 38 forks.

eriklundgren/distributed-training-benchmarks - Benchmarking suite comparing distributed training approaches across different hardware configurations. 320 stars, 25 forks.

eriklundgren/ml-pipeline-automation - Automated ML pipeline orchestration using Airflow with Docker containerization and cloud deployment examples. 280 stars, 18 forks.

eriklundgren/data-preprocessing-utilities - Reusable Python library for common data preprocessing, cleaning, and augmentation tasks for computer vision datasets. 195 stars, 12 forks.
