PROFESSIONAL SUMMARY

I'm a Staff Engineer with 14 years of progressive experience designing and implementing large-scale distributed systems. I've led technical teams through complex infrastructure migrations, mentored junior engineers, and driven architectural decisions that have improved system reliability and performance. I'm committed to solving challenging technical problems while fostering a culture of continuous learning and operational excellence.

WORK EXPERIENCE

Staff Engineer

TechVision Solutions

techvision.io

Glasgow, United Kingdom

March 2022 - Present

Led the design and implementation of a microservices architecture serving 2 million daily active users, reducing latency by 40% and improving system reliability to 99.99% uptime

Mentored a team of 8 engineers across backend and infrastructure disciplines, conducting code reviews and establishing technical standards that improved code quality metrics by 35%

Spearheaded migration from monolithic application to Kubernetes-based infrastructure, reducing deployment time from 2 hours to 15 minutes and enabling continuous deployment practices

Architected and deployed real-time data pipeline processing 500GB daily using Apache Kafka and Elasticsearch, enabling critical business intelligence features and reducing reporting latency from days to minutes

Senior Software Engineer

DataCore Systems Ltd

www.datacore.com

Edinburgh, United Kingdom

January 2019 - February 2022

Developed and maintained high-performance database systems handling 100+ TB of data across 50+ production clusters serving enterprise clients globally

Implemented automated monitoring and alerting infrastructure using Prometheus and Grafana, reducing mean time to resolution for critical incidents from 4 hours to 30 minutes

Designed distributed caching layer using Redis cluster architecture, improving application response times by 60% and reducing database load by 45%

Led cross-functional collaboration with product and infrastructure teams to define SLOs and implement service reliability improvements, increasing customer satisfaction scores from 8.2 to 9.1 out of 10

Software Engineer

Pinnacle Digital Group Ltd

pinnacle-digital.net

Glasgow, United Kingdom

July 2010 - December 2018

Built and maintained RESTful APIs handling 10 million requests daily, implementing rate limiting and authentication mechanisms to support multi-tenant SaaS platform

Optimized critical database queries and implemented indexing strategies, reducing query execution time by 55% and improving overall application performance

Collaborated with DevOps team to establish CI/CD pipelines using Jenkins, reducing manual deployment errors by 90% and enabling multiple daily releases

Mentored 5 junior developers on software engineering best practices, design patterns, and system architecture principles

EDUCATION

BSc Computer Science

University of Glasgow

Glasgow, United Kingdom

2006 - 2010

SKILLS

Languages: Java, Python, Go, SQL, Bash, JavaScript

Databases: PostgreSQL, MySQL, MongoDB, Elasticsearch, Redis

Cloud and Infrastructure: AWS, Docker, Kubernetes, Terraform, Jenkins

Distributed Systems: Apache Kafka, RabbitMQ, gRPC, microservices architecture

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog

Version Control: Git, GitHub, GitLab

Methodologies: Agile, Scrum, technical leadership, system design
