PROFESSIONAL SUMMARY

Results-driven Research Engineer with 6 years of progressive experience in advanced systems development and infrastructure optimization. Proven track record of designing and implementing cutting-edge solutions that drive organizational innovation. Known for strong technical acumen and ability to collaborate effectively across multidisciplinary teams. Seeking challenging opportunities to contribute expertise in emerging technologies and research methodologies.

WORK EXPERIENCE

Graduate Research Assistant

TechVision Labs

techvisionlabs.io

Cambridge, United Kingdom

June 2018 - August 2019

Directed a team of 25+ software engineers across multiple research departments overseeing quarterly deliverables and strategic roadmap planning

Architected and deployed distributed machine learning pipelines processing over 2 terabytes of real-time data daily

Single-handedly managed \$8.7 million annual research budget with accountability for vendor relations and capital allocation

Established organizational standards for code quality, documentation, and continuous integration practices across the division

Principal Research Engineer

Quantum Dynamics Research Group

quantumdynamics.co

Cambridge, United Kingdom

September 2019 - March 2021

Led innovation initiatives resulting in 15 published peer-reviewed papers and 3 patents filed with the UK Intellectual Property Office

Designed experimental frameworks for quantum computing simulation using Python and custom C++ libraries

Mentored 8 junior researchers and contributed to the recruitment and onboarding of research staff

Developed comprehensive documentation and technical specifications for proprietary algorithms and methodologies

Senior Research Engineer

Cambridge Advanced Systems Ltd

www.cambridgeadvancedsystems.com

Cambridge, United Kingdom

April 2021 - Present

Pioneered novel approaches to systems performance optimization reducing latency by 45% across production environments

Conducted extensive literature reviews and comparative analysis of emerging research methodologies in distributed systems

Collaborated with cross-functional teams to define technical requirements and validation criteria for new research initiatives

Published 4 technical papers in collaboration with academic partners at University of Cambridge and Imperial College London

EDUCATION

Doctor of Philosophy in Computer Science

University of Cambridge

Cambridge, United Kingdom

2015 - 2018

Bachelor of Science in Computer Science (First Class Honours)

University of Cambridge

Cambridge, United Kingdom

2011 - 2015

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, Go, Rust

Machine Learning: TensorFlow, PyTorch, scikit-learn, XGBoost

Container Orchestration: Kubernetes, Docker Swarm, OpenShift

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Platforms: ArgoCD, Jenkins, GitLab CI, GitHub Actions

Cloud Platforms: AWS, Google Cloud Platform, Microsoft Azure

Data Processing: Apache Spark, Apache Kafka, Hadoop

Databases: PostgreSQL, MongoDB, Cassandra, Redis

Monitoring and Logging: Prometheus, ELK Stack, Datadog, New Relic

Research Tools: MATLAB, Jupyter Notebooks, LaTeX, Git
