PROFESSIONAL SUMMARY

Highly accomplished Staff Engineer with 10 years of progressive experience architecting and delivering scalable distributed systems. Proven track record leading cross-functional teams and driving technical innovation across cloud infrastructure and backend services. Passionate about mentoring junior engineers and establishing engineering excellence through best practices and automation frameworks.

WORK EXPERIENCE

Junior Systems Engineer

SynergyTech Solutions

synergytech.io

Amsterdam, Netherlands

January 2014 - June 2015

Architected and led the migration of 150+ microservices from on-premises to Kubernetes clusters managing 45 direct reports across five engineering teams. Implemented comprehensive dbt pipelines for ETL workflows achieving 60% reduction in data processing latency. Designed and deployed GitHub Actions CI/CD workflows across 200+ repositories reducing deployment time by 75%. Mentored team of 22 engineers on cloud-native architecture patterns and container orchestration best practices.

Senior Principal Engineer

CloudVault Dynamics

cloudvault.net

Amsterdam, Netherlands

July 2015 - November 2016

Managed individual contributor responsibilities while overseeing global infrastructure team of 8 engineers supporting 40 million monthly active users. Developed LangChain-powered natural language query interfaces for internal data analytics platform enabling non-technical stakeholders to access insights. Led architectural decisions for multi-region disaster recovery implementation across three continents. Established incident response framework reducing MTTR by 55% and improving system reliability to 99.99% uptime SLA.

Staff Engineer

Booking.com

booking.com

Amsterdam, Netherlands

December 2016 - Present

Leading the design and development of distributed payment processing systems handling 2 million transactions daily with zero data loss guarantees. Architecting microservices infrastructure utilizing gRPC and protocol buffers reducing inter-service latency by 40%. Mentoring technical staff on software architecture and code quality standards while driving quarterly architecture reviews. Implementing comprehensive monitoring and observability solutions using Prometheus and ELK stack improving debugging efficiency across 15 backend teams.

EDUCATION

MSc Computer Science

University of Amsterdam

Amsterdam, Netherlands

2012 - 2014

BSc Information Technology

University of Amsterdam

Amsterdam, Netherlands

2008 - 2012

TECHNICAL SKILLS

Languages: Python, Go, Java, Kotlin, SQL, Bash, JavaScript

Cloud Platforms: AWS, GCP, Azure, Kubernetes

Databases: PostgreSQL, MongoDB, Redis, Cassandra, DynamoDB

Messaging: Kafka, RabbitMQ, Apache Pulsar

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog, Jaeger

Infrastructure as Code: Terraform, Helm, Docker, CloudFormation

CI/CD: Jenkins, GitLab CI, GitHub Actions

Architecture Patterns: Microservices, Event-Driven Architecture, CQRS, Domain-Driven Design
