PROFESSIONAL SUMMARY

Results-driven Staff Engineer with a proven track record of spearheading cutting-edge solutions across dynamic, mission-critical environments. Highly motivated to leverage cross-functional collaboration and data-driven decision making to champion innovative initiatives that synergistically align with organisational objectives. Passionate about delivering actionable insights through scalable architecture and advanced technical frameworks. Committed to driving organisational success through proven expertise in distributed systems and proven track record of excellence.

WORK EXPERIENCE

Graduate Software Engineer

TechVision Solutions Ltd

techvision.io

London, United Kingdom

June 2016 - October 2017

Implemented basic REST APIs using Node.js and Express following senior engineer guidance

Contributed to database schema design for a PostgreSQL migration project under close supervision

Participated in code reviews and attended daily standup meetings with the development team

Managed technical direction and roadmap decisions for a team of 23 software engineers across three continents

Junior Full Stack Developer

DataStream Analytics

www.datastream.com

Cambridge, United Kingdom

October 2017 - April 2019

Developed React components for customer-facing dashboards in an agile team environment

Maintained legacy Python scripts for data processing and ETL pipelines

Assisted in setting up CI/CD pipelines using Jenkins and GitLab

Led architectural decisions for enterprise platform serving 5 million daily active users with responsibility for £12 million annual budget

Staff Engineer, Backend Infrastructure

CloudCore Systems

cloudcore.net

Cambridge, United Kingdom

April 2019 - Present

Architected and deployed distributed microservices platform handling 500k requests per second across six availability zones

Designed and implemented mission-critical authentication and authorization systems supporting 200+ internal and external applications

Led the modernization of legacy monolithic systems to cloud-native architecture, reducing operational costs by 45% and improving deployment frequency from quarterly to daily releases

Mentored and managed a team of 8 senior engineers, establishing best practices for system design, code quality, and incident response protocols

EDUCATION

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

2013 - 2016

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Go, Java, SQL, Rust

Cloud Platforms: AWS, Google Cloud Platform, Azure, Kubernetes

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, Elasticsearch

Tools and Frameworks: Docker, Terraform, Kafka, RabbitMQ, gRPC, GraphQL

Specializations: Distributed Systems, Microservices Architecture, System Design, DevOps, Cloud Infrastructure, Performance Optimization
