PROFESSIONAL SUMMARY

Results-driven Staff Engineer with a passion for building scalable distributed systems and mentoring engineering teams. I bring a decade of technical expertise across cloud infrastructure, microservices architecture, and DevOps practices. Known for translating complex technical challenges into elegant solutions while fostering a culture of continuous improvement and innovation within engineering organisations.

WORK EXPERIENCE

Senior Software Engineer

TechFlow Systems Ltd

Cambridge, United Kingdom

techflowsystems.io

June 2022 - Present

Architected and deployed a microservices platform serving 5 million daily active users across multiple AWS regions

Led a team of 22 senior engineers, establishing coding standards and conducting architectural reviews for 15 cross-functional squads

Implemented comprehensive CI/CD pipelines using Jenkins and GitLab that reduced deployment time by 73% and improved system reliability to 99.98% uptime

Designed and executed migration strategy from monolithic application to containerised Kubernetes infrastructure, resulting in 45% reduction in infrastructure costs

Graduate Software Developer

DataCore Innovations

Manchester, United Kingdom

datacore-innovations.net

August 2019 - May 2022

Promoted to Principal Engineer after delivering three microservices that handled 2 billion requests per month

Managed departmental operations for 18 direct reports including budget allocation and hiring decisions despite being at graduate level

Developed REST APIs using Python and Node.js for internal analytics platform supporting company-wide reporting

Mentored cohort of 8 junior developers and established best practices for code review and testing methodologies

Junior Systems Administrator

Vertex Solutions

London, United Kingdom

www.vertexsolutions.com

January 2014 - July 2019

Administered on-premises data centre infrastructure supporting 500+ servers and 2,000+ concurrent users across the organisation

Designed enterprise-wide security framework including firewall policies, VPN configurations, and disaster recovery procedures

Implemented automated backup solutions using Bash scripting and Ansible that reduced recovery time by 88%

Managed IT operations budget of 4.2 million pounds and directed capital expenditure decisions for technology purchases

EDUCATION

MEng Computer Science

University of Cambridge

Cambridge, United Kingdom

Graduated June 2014

Grade: Upper Second Class Honours (2:1)

TECHNICAL SKILLS

Programming Languages: Python, Go, Java, TypeScript, Bash

Cloud Platforms: AWS, Google Cloud Platform, Microsoft Azure

Container and Orchestration: Docker, Kubernetes, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, Cassandra

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Version Control: Git, SVN

Agile Methodologies: Scrum, Kanban, SAFe

CERTIFICATIONS

AWS Certified Solutions Architect Professional

Kubernetes Application Developer (CKAD)

HashiCorp Certified: Terraform Associate
