PROFESSIONAL SUMMARY

Results-driven Data Scientist with 5 years of experience building predictive models and deriving actionable insights from complex datasets. Skilled in Python, SQL, and machine learning frameworks with a proven track record of delivering business impact through data-driven solutions. Passionate about leveraging statistical analysis and AI to solve real-world problems and drive organizational growth. Known for translating technical findings into clear recommendations for non-technical stakeholders.

WORK EXPERIENCE

Senior Data Scientist

Quantum Insights Analytics

www.quantuminsightsanalytics.io

Leeds, United Kingdom

March 2022 - Present

Developed and deployed machine learning models for customer churn prediction, achieving 89% accuracy and identifying at-risk segments for retention campaigns. Conducted exploratory data analysis on datasets exceeding 50 million records using Python and SQL to uncover patterns in user behaviour. Built automated data pipelines using Apache Spark to streamline ETL processes and reduce data preparation time by 40%. Mentored junior analysts on statistical methodologies and best practices in model evaluation, contributing to team capability development.

Data Scientist

Prism Data Solutions Ltd

www.prismdatasolutions.net

Manchester, United Kingdom

August 2019 - February 2022

Designed and implemented time series forecasting models for demand planning, improving inventory accuracy by 23% and reducing operational costs. Created interactive dashboards using Tableau and Python to visualize KPIs and enable data-driven decision-making across departments. Performed feature engineering on 15+ datasets to optimize model performance and interpretability for business stakeholders. Collaborated with product teams to develop recommendation algorithms that increased user engagement by 17%.

Data Analyst

Deloitte

www.deloitte.com

London, United Kingdom

July 2018 - July 2019

Conducted statistical analysis on client datasets to support business strategy and identify growth opportunities across multiple industry verticals. Developed Python scripts to automate routine reporting tasks, saving approximately 20 hours per month across the analytics team. Performed data quality assessments and created

comprehensive documentation for data governance frameworks. Presented findings to C-level executives using clear visualizations and narrative-driven storytelling techniques.

EDUCATION

MSc Data Science

University of Manchester

Manchester, United Kingdom

Graduated: September 2018

BSc Mathematics with Statistics

University of Leeds

Leeds, United Kingdom

Graduated: June 2016

TECHNICAL SKILLS

Languages: Python, R, SQL, Scala

Machine Learning: Scikit-learn, TensorFlow, XGBoost, Logistic Regression, Random Forest, Neural Networks, Time Series Analysis

Data Manipulation & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI

Databases: PostgreSQL, MySQL, MongoDB, Snowflake

Big Data & Cloud: Apache Spark, AWS (S3, EC2, SageMaker), Azure Databricks

Statistical Analysis: Hypothesis Testing, A/B Testing, Regression Analysis, Bayesian Methods

Tools & Platforms: Jupyter Notebook, Git, Airflow, Looker, Excel
