PROFESSIONAL SUMMARY

Experienced Staff Frontend Engineer with 14 years of progressive expertise in building scalable web applications and leading frontend architecture decisions. Proven track record of mentoring junior developers, driving technical innovation, and delivering high-impact solutions across diverse industries. Passionate about clean code, performance optimization, and creating intuitive user experiences. Seeking to leverage deep technical knowledge and leadership capabilities in a challenging role.

WORK EXPERIENCE

Staff Frontend Engineer

Nexus Digital Solutions

nexusdigital.io

Oxford, United Kingdom

March 2021 - Present

Led the architectural redesign of the flagship product frontend, resulting in 40% improvement in page load times and reduced bundle size by 35% through strategic code splitting and lazy loading implementation. Mentored a team of 5 frontend engineers, establishing code review standards and conducting technical interviews that elevated team capability and consistency across all projects. Implemented comprehensive testing strategy using Jest and React Testing Library, increasing test coverage from 45% to 82% and significantly reducing production bugs. Spearheaded the migration from legacy AngularJS to React with TypeScript, managing the transition of 50+ components across multiple sprints while maintaining zero downtime in production environments.

Senior Frontend Engineer

Velocity Tech Group Ltd

velocitytech.net

London, United Kingdom

June 2017 - February 2021

Developed and maintained responsive web applications using Vue.js and React, serving over 2 million monthly active users across multiple platforms and devices. Built reusable component libraries and established design system documentation, reducing development time for new features by 30% and improving consistency across product offerings. Optimized application performance through profiling and refactoring, achieving Lighthouse scores above 90 and improving Core Web Vitals metrics critical for search engine rankings. Collaborated with UX designers and product managers to translate wireframes and user stories into pixel-perfect, fully functional interfaces using modern CSS techniques and accessibility best practices.

Frontend Developer

Clearwater Interactive

www.clearwaterinteractive.com

Reading, United Kingdom

August 2010 - May 2017

Built and maintained multiple customer-facing web applications using jQuery, AngularJS, and HTML5, supporting both desktop and mobile devices for financial services clients. Implemented interactive dashboards and data

visualization components using D3.js and custom Canvas implementations, enabling clients to make data-driven business decisions. Participated in agile development cycles, estimating stories and delivering features on schedule with minimal technical debt and comprehensive documentation. Contributed to the establishment of frontend best practices and coding standards that were adopted across the organization and improved code maintainability.

EDUCATION

Bachelor of Science in Computer Science
University of Oxford
Oxford, United Kingdom
Graduated: July 2010

TECHNICAL SKILLS

Frontend Frameworks and Libraries: React, Vue.js, TypeScript, AngularJS, Angular
Styling and Layout: CSS3, SASS, CSS-in-JS, Tailwind CSS, Bootstrap, Flexbox, Grid
Build Tools and Bundlers: Webpack, Vite, Parcel, npm, yarn
Testing Frameworks: Jest, React Testing Library, Cypress, Mocha, Chai
Version Control: Git, GitHub, GitLab, Bitbucket
Performance Optimization: Code splitting, lazy loading, tree shaking, image optimization, Core Web Vitals
APIs and Backend Integration: REST APIs, GraphQL, Fetch API, Axios
Accessibility: WCAG 2.1 compliance, ARIA, semantic HTML, screen reader testing
DevOps and Deployment: Docker, CI/CD pipelines, Jenkins, GitHub Actions, AWS S3
Other Tools: Figma, Chrome DevTools, Postman, Jira, Confluence
