PROFESSIONAL SUMMARY

Experienced Staff Engineer with 14 years of progressive experience in distributed systems, cloud architecture, and backend infrastructure. Proven track record of leading technical initiatives across multiple organizations, mentoring engineering teams, and delivering scalable solutions that support millions of transactions. Strong focus on system reliability, performance optimization, and establishing technical standards that drive organizational growth.

WORK EXPERIENCE

Staff Engineer - Cloud Infrastructure

TechVenture GmbH (techventure.io)

Berlin, Germany

September 2020 - Present

Architected and implemented microservices infrastructure supporting 500+ daily deployments across multiple regions

Led migration of monolithic applications to event-driven architecture, reducing latency by 40% and improving system resilience

Designed and built comprehensive observability platform using metrics, logs, and traces for real-time monitoring across 200+ services

Mentored 8 junior and mid-level engineers, establishing best practices for code review, documentation, and architectural decision-making

Senior Software Engineer - Backend Systems

CloudFlow Solutions (cloudflow.net)

Berlin, Germany

January 2021 - August 2020

Developed high-performance REST APIs handling 100k requests per second with sub-100ms latency requirements

Optimized database query patterns and implemented intelligent caching strategies, reducing infrastructure costs by 35%

Led cross-functional initiative to establish unified logging and centralized alerting standards across engineering teams

Implemented comprehensive performance testing framework for load validation and capacity planning

Senior Backend Engineer - Platform Engineering

Innovate Systems AG

Munich, Germany

March 2017 - December 2020

Built core platform services supporting payment processing for 50+ enterprise clients across DACH region

Designed resilient distributed systems with multi-region failover and 99.99% uptime SLA achievement

Established CI/CD pipelines and automated deployment processes reducing release cycles from weekly to daily

Led technical recruitment and onboarding programs, growing platform team from 4 to 12 engineers

EDUCATION

Dipl.-Inf. (Diplom in Computer Science)

Technical University of Berlin (Technische Universität Berlin)

Berlin, Germany

Graduated: July 2010

TECHNICAL SKILLS

Languages: Go, Java, Python, TypeScript, SQL, Bash

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, DynamoDB), Google Cloud Platform

Containerization and Orchestration: Docker, Kubernetes, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, ArgoCD, Ansible

Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog, Jaeger

Version Control: Git, GitHub, GitLab

Methodologies: Agile, Scrum, Microservices Architecture, Domain-Driven Design
