PROFESSIONAL SUMMARY

Results-driven Data Engineer with 8 years of experience designing and implementing large-scale data infrastructure solutions. Proven expertise in building ETL pipelines, cloud data warehousing, and real-time analytics platforms. Passionate about optimizing data workflows and mentoring junior engineers to deliver business impact. Known for translating complex requirements into scalable technical solutions.

WORK EXPERIENCE

Principal Data Engineer

DataFlow Systems Ltd

dataflowsystems.io

Manchester, United Kingdom

January 2023 - Present

Architected and deployed enterprise-wide data lake infrastructure serving 150+ stakeholders across 8 business units with petabyte-scale data processing capabilities. Led strategic initiatives to modernize legacy ETL systems, reducing processing times by 65% and saving GBP 420,000 annually in cloud infrastructure costs. Directed a team of 24 engineers across data engineering, analytics, and platform reliability functions, establishing best practices for code quality and deployment standards. Presented quarterly business reviews to C-suite executives demonstrating ROI on data initiatives and securing budget allocations for emerging technologies.

Senior Data Pipeline Developer

Nexus Analytics

nexus-analytics.co

Leeds, United Kingdom

August 2019 - December 2022

Developed and maintained 120+ production data pipelines processing 2.5 terabytes daily across AWS and Google Cloud Platform environments. Implemented automated data quality frameworks reducing data errors by 78% and improving stakeholder confidence in analytics outputs. Collaborated with finance and marketing teams to design dimensional data models supporting 40+ interactive dashboards and real-time reporting requirements. Optimized Spark jobs through performance tuning and partitioning strategies, decreasing job execution times by 52%.

Junior ETL Engineer

Sterling Data Solutions Ltd

sterlingdata.net

Leeds, United Kingdom

June 2016 - July 2019

Created 45 ETL processes using Python and SQL to integrate data from disparate legacy systems into centralised warehouse environments. Managed database administration responsibilities for production PostgreSQL and MySQL instances serving 300+ concurrent users with 99.8% uptime. Oversaw digital transformation project coordinating with 18 external vendors and directing implementation of enterprise data platform affecting 500+ employees. Built automated monitoring and alerting systems using Elasticsearch and Grafana detecting issues

within 2 minutes of occurrence.

EDUCATION

BSc Computer Science (Upper Second-Class Honours)

University of Leeds

Leeds, United Kingdom

2012 - 2016

TECHNICAL SKILLS

Languages: Python, SQL, Scala, Java, Bash

Big Data Technologies: Apache Spark, Apache Airflow, Apache Kafka, Hadoop

Cloud Platforms: AWS (S3, Redshift, EC2, Lambda), Google Cloud Platform (BigQuery, Dataflow), Azure Data Factory

Data Warehousing: Snowflake, Redshift, BigQuery, PostgreSQL, MySQL

Tools and Frameworks: Git, Tableau, Looker, dbt, Jenkins, Docker, Kubernetes

Databases: PostgreSQL, MySQL, MongoDB, Cassandra

Methodologies: Agile, Scrum, CI/CD pipelines, Test-Driven Development
