PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff Backend Engineer with proven track record of leveraging cutting-edge technologies to spearhead mission-critical initiatives. Passionate about delivering actionable insights through data-driven decision making whilst championing cross-functional collaboration to achieve organisational objectives. Synergistically driving innovative solutions that enable dynamic business growth and operational excellence. Committed to architecting scalable systems that unlock organisational value and support strategic vision.

TECHNICAL SKILLS

Languages: Python, Java, Go, SQL, JavaScript

Frameworks and Libraries: Spring Boot, Django, FastAPI, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Cloud Platforms: AWS (EC2, S3, RDS, Lambda), Google Cloud Platform, Azure

Container Technologies: Docker, Kubernetes, Docker Compose

Message Queues: RabbitMQ, Apache Kafka, AWS SQS

API Design: REST, GraphQL, gRPC

DevOps and Tools: Jenkins, GitLab CI/CD, Terraform, Prometheus, ELK Stack

Architecture Patterns: Microservices, Event-Driven Architecture, CQRS, Domain-Driven Design

Version Control: Git, GitHub, GitLab

WORK EXPERIENCE

Staff Backend Engineer

Synapse Data Ltd

<https://synapsedataltd.io>

Bristol, United Kingdom

March 2022 - Present

Led architectural redesign of core payment processing system migrating from monolithic architecture to microservices, reducing latency by 40 percent and improving system resilience

Spearheaded implementation of event-driven architecture using Apache Kafka, enabling real-time data processing for 50 million daily transactions across multiple business units

Mentored team of 5 junior and mid-level engineers, establishing code review standards and fostering knowledge sharing culture that improved code quality metrics by 35 percent

Designed and implemented comprehensive monitoring solution using Prometheus and Grafana, providing actionable insights into system performance and reducing mean time to resolution by 45 percent

Senior Backend Engineer

Ocado Technology

<https://ocadotech.com>

Bristol, United Kingdom

August 2019 - February 2022

Architected scalable order processing platform using Go and PostgreSQL, handling 100,000 concurrent users and processing 500,000 orders daily with 99.99 percent uptime

Implemented distributed caching strategy using Redis, reducing database load by 60 percent and improving API response times from 800ms to 120ms

Developed comprehensive API gateway service using Spring Boot, consolidating 12 legacy microservices and standardizing authentication mechanisms across the platform

Led migration of 200 microservices from traditional servers to Kubernetes, automating deployment pipeline and reducing infrastructure costs by 38 percent

Backend Engineer

Just Eat Takeaway.com

<https://www.justeattakeaway.com>

Bristol, United Kingdom

June 2014 - July 2019

Developed and maintained high-traffic RESTful APIs serving 2 million daily active users across UK and international markets using Python and Django

Implemented real-time order tracking system using WebSockets and event streaming, improving customer satisfaction scores by 22 percent

Collaborated with data science team to build recommendation engine processing user behaviour data through machine learning pipelines running on AWS Lambda

Optimized critical database queries, implementing proper indexing strategies and query refactoring, reducing query execution times by 55 percent and improving overall system throughput

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

2010 - 2013

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certified Solutions Architect - Professional (2021)

Kubernetes Application Developer (CKAD) Certification (2020)
