PROFESSIONAL SUMMARY

Experienced Principal Engineer with 12 years of progressive technical leadership in cloud infrastructure and enterprise software architecture. Proven track record designing and implementing large-scale distributed systems supporting millions of transactions daily. Strong background in mentoring engineering teams, driving technical strategy, and delivering business-critical solutions across financial services and technology sectors.

WORK EXPERIENCE

Principal Engineer

CloudVault Systems BV

Amsterdam, Netherlands

cloudvaultsystems.io

March 2021 - Present

Architected and led migration of legacy monolithic payment processing platform to microservices infrastructure handling 500K daily transactions with 99.99% uptime

Designed and implemented comprehensive disaster recovery strategy across three European data centers, reducing RTO from 8 hours to 15 minutes

Mentored team of 8 senior engineers on system design principles and best practices for distributed systems

Established technical standards and code review processes that reduced production incidents by 64% year-over-year

Senior Software Architect

TechNova Solutions

Rotterdam, Netherlands

technova-solutions.net

June 2017 - February 2021

Led development of data warehousing platform using dbt for transformation pipelines serving 20+ enterprise clients

Managed transition from on-premises infrastructure to hybrid cloud architecture utilizing Docker and Kubernetes orchestration

Implemented CI/CD pipelines using GitHub Actions to automate testing and deployment across development and production environments

Designed and deployed real-time analytics engine using Apache Kafka processing 2 terabytes of data daily

Staff Software Engineer

ING Netherlands

Amsterdam, Netherlands

ing.nl

September 2012 - May 2017

Developed RESTful API framework used by 30+ internal teams, handling 10 million requests per day across financial services applications

Led technical interviews and hiring initiatives that expanded engineering team from 12 to 35 members over four years

Implemented automated testing infrastructure that improved code coverage from 42% to 88% within 18 months

Contributed to open source projects and published technical articles on software architecture patterns in enterprise environments

EDUCATION

Master of Science in Computer Science

University of Amsterdam

Amsterdam, Netherlands

Graduated: 2012

TECHNICAL SKILLS

Languages: Java, Python, Go, TypeScript, SQL, Scala

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container and Orchestration: Docker, Kubernetes, Terraform, ArgoCD

Databases: PostgreSQL, MongoDB, Elasticsearch, DynamoDB, Cassandra

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

Development Tools: Git, Jenkins, Docker Compose

Enterprise Systems: Microservices architecture, System design, Distributed systems

Data Technologies: Spark, Hadoop, Airflow

Modern ML Frameworks: LangChain, HuggingFace Transformers

Infrastructure as Code: Terraform, CloudFormation

CERTIFICATIONS

AWS Solutions Architect Professional

Issued: 2019

Certified Kubernetes Administrator (CKA)

Issued: 2020
