PROFESSIONAL SUMMARY

I am a Junior Data Engineer with 1 year of professional experience building data pipelines and ETL processes. I have a strong foundation in Python, SQL, and cloud data platforms, with hands-on experience working with AWS and Apache Spark. I am passionate about optimizing data workflows and extracting meaningful insights from large datasets. I thrive in collaborative environments and am eager to develop my skills in advanced data architecture and distributed computing.

WORK EXPERIENCE

Data Engineer

Pixel Analytics Ltd (Previously known as DataStream Innovations)

Cambridge, United Kingdom

August 2023 - Present

Developed and maintained Python-based ETL pipelines processing 50GB+ of daily transaction data using Apache Spark on AWS EMR clusters

Optimized SQL queries on PostgreSQL databases, reducing average query execution time by 35% through indexing and query restructuring

Collaborated with analytics team to design and implement data warehousing solutions using AWS Redshift, supporting 15+ downstream BI dashboards

Documented data pipeline architecture and created runbooks for monitoring and alerting using CloudWatch and PagerDuty

Junior Data Engineer

Vertex Data Solutions

London, United Kingdom

January 2023 - July 2023

Website: vertexdata.co.uk

Built Python scripts to automate data extraction from multiple REST APIs and store outputs in S3 data lakes

Worked on a team of 3 to migrate legacy ETL processes from on-premise systems to AWS cloud infrastructure

Created comprehensive data quality validation frameworks using Great Expectations to catch data anomalies before downstream processing

Supported senior engineers in debugging complex data pipeline failures and implemented monitoring solutions using ELK Stack

Data Analyst Intern

TechCore Solutions

Cambridge, United Kingdom

June 2022 - December 2022

Website: techcoresolutions.io

Wrote SQL queries to extract and transform data from MySQL databases for business intelligence reporting

Assisted in building Python data processing scripts to clean and validate datasets of 1-2 million records

Created visual dashboards using Tableau to present data insights to non-technical stakeholders

Participated in sprint planning and daily standups, delivering on-time completion of 95% of assigned tasks

EDUCATION

BSc Computer Science

University of Cambridge

Cambridge, United Kingdom

Graduated: June 2022

Relevant Coursework: Data Structures and Algorithms, Database Systems, Software Engineering, Distributed Systems

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, Bash

Big Data Tools: Apache Spark, Hadoop, Hive

Cloud Platforms: AWS (EC2, S3, RDS, EMR, Redshift, Lambda, CloudWatch)

Databases: PostgreSQL, MySQL, MongoDB, AWS DynamoDB

Data Tools: Apache Airflow, Great Expectations, Pandas, NumPy

Version Control: Git, GitHub, GitLab

Other: Linux, Docker, JIRA, Tableau, JSON/CSV data formats

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certified Cloud Practitioner (2023)

Winner of Cambridge University Computer Science Hackathon 2021

Contributing member of open-source Apache Spark community forums

PUBLIC REPOSITORIES

github.com/jwparker92/spark-etl-pipeline - Python Spark ETL framework with unit tests and documentation

github.com/jwparker92/data-quality-validator - Great Expectations data validation toolkit for CSV and Parquet files

github.com/jwparker92/aws-lambda-data-processor - Serverless data processing functions for JSON to Parquet conversion

github.com/jwparker92/sql-query-optimizer - Collection of optimized SQL query patterns for common data warehouse scenarios
