PROFESSIONAL SUMMARY

Dedicated Data Scientist with 4 years of experience building machine learning models and driving data-informed decision making in fast-paced environments. Skilled in Python, SQL, and data visualization with a strong track record of delivering insights that directly impact business outcomes. Passionate about solving complex problems through statistical analysis and pattern recognition. Looking to leverage technical expertise and business acumen to contribute to innovative data science initiatives.

WORK EXPERIENCE

Data Scientist

DataFlow Analytics

<https://www.dataflow-analytics.io>

Lisbon, Portugal

June 2022 - Present

Developed and deployed 12+ predictive models using scikit-learn and XGBoost to forecast customer churn, resulting in a 15% reduction in user attrition

Designed and maintained ETL pipelines processing 500GB+ of daily transaction data using Python and Apache Spark

Created interactive dashboards in Tableau and Power BI for C-level executives, enabling data-driven strategic decisions

Led cross-functional workshops with product and marketing teams to translate business requirements into machine learning solutions

Junior Data Scientist

TechInsight Solutions

<https://www.techinsight.co>

Lisbon, Portugal

January 2021 - May 2022

Built classification models for fraud detection achieving 94% accuracy and reducing false positives by 22%

Performed exploratory data analysis on customer behavioral datasets using pandas and matplotlib to identify key business drivers

Conducted A/B testing analysis for mobile app features, providing statistical significance assessments and recommendations

Documented analysis workflows and created technical guides for junior team members to ensure knowledge transfer and reproducibility

Data Analyst

Digital Ventures Ltd

<https://www.digitalventures.net>

Lisbon, Portugal

August 2019 - December 2020

Analyzed user engagement metrics across web and mobile platforms using SQL and Google Analytics to inform product roadmap decisions

Created automated reporting solutions using Python scripts that reduced manual reporting time by 18 hours per week

Performed statistical analysis on marketing campaign performance data to optimize targeting and budget allocation

Supported senior data scientists with data cleaning, feature engineering, and model evaluation tasks for multiple projects

EDUCATION

Master of Science in Data Science and Advanced Analytics

Instituto Superior Técnico, Universidade de Lisboa

Lisbon, Portugal

September 2017 - July 2019

Bachelor of Science in Statistics

Faculdade de Ciências, Universidade de Lisboa

Lisbon, Portugal

September 2013 - June 2017

SKILLS

Technical Skills: Python, SQL, R, Scikit-learn, XGBoost, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI, Google Analytics, Apache Spark, Kubernetes, Terraform, ArgoCD, Git, Docker

Core Competencies: Machine Learning, Statistical Analysis, Data Visualization, Predictive Modeling, Feature Engineering, A/B Testing, ETL Pipeline Development, Business Intelligence, Data Storytelling

Soft Skills: Cross-functional Collaboration, Problem Solving, Technical Communication, Project Management, Mentoring

GITHUB REPOSITORIES

Machine Learning Model Comparison Framework

<https://github.com/joaosilva-ds/ml-model-comparison>

Benchmark tool comparing performance of classification algorithms on tabular datasets

Customer Segmentation Analysis

<https://github.com/joaosilva-ds/customer-segmentation>

K-means clustering implementation with visualization for RFM analysis

Time Series Forecasting Library

<https://github.com/joaosilva-ds/timeseries-forecasting>

Python package for ARIMA and exponential smoothing models

Data Pipeline Automation Scripts

<https://github.com/joaosilva-ds/data-pipeline-automation>

Collection of ETL scripts for common data processing tasks
