PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff DevOps Engineer with 12 years of proven track record in spearheading cutting-edge infrastructure solutions across dynamic organisations. Passionate about delivering value through cross-functional collaboration and leveraging mission-critical technologies to drive actionable insights. Champion of innovative approaches to cloud architecture and containerisation, committed to synergistically optimising organisational objectives through data-driven decision making and proven expertise in establishing scalable, resilient systems that translate to measurable business impact.

WORK EXPERIENCE

Staff DevOps Engineer

TechVault Solutions (Previously known as CloudForge Innovations)

www.techvault-solutions.com

Glasgow, United Kingdom

March 2021 - Present

Architected and deployed enterprise-grade Kubernetes clusters supporting 50+ microservices across multi-region AWS infrastructure, resulting in 40% reduction in deployment time and improved system reliability to 99.99% uptime. Established comprehensive CI/CD pipelines using GitLab Runner and Jenkins, enabling 200+ daily deployments with automated testing and security scanning protocols. Led infrastructure-as-code initiatives utilising Terraform and Ansible, standardising deployment processes across 15 cross-functional teams and reducing configuration drift by 85%. Mentored junior engineers in DevOps best practices, cloud security compliance frameworks, and incident response procedures, developing 8 team members into senior technical roles.

Senior DevOps Engineer

Acme Digital Services Ltd

www.acmedigital.co.uk

Edinburgh, United Kingdom

September 2016 - February 2021

Migrated legacy monolithic applications to containerised microservices architecture using Docker and orchestrated deployments across on-premise and AWS environments. Implemented comprehensive monitoring and observability stack utilising Prometheus, Grafana, ELK Stack and DataDog, reducing mean time to resolution for incidents by 65%. Designed and maintained disaster recovery and business continuity procedures achieving RPO of 1 hour and RTO of 4 hours across critical systems. Automated infrastructure provisioning reducing manual

configuration time by 70% through IaC tools and streamlined onboarding processes for development teams.

DevOps Engineer

Nexus Technology Group

nexus-tech.io

Manchester, United Kingdom

June 2012 - August 2016

Managed production Linux environments supporting 20+ applications across 150+ virtual machines using Puppet and Chef for configuration management. Built custom monitoring solutions and alerting frameworks using Nagios and Zabbix, improving incident detection time from 45 minutes to under 5 minutes. Implemented automated backup and recovery procedures across SAN storage infrastructure, achieving successful recovery tests in 98% of scenarios. Collaborated with development teams to implement Docker containerisation pilot project, resulting in successful transition of 5 legacy applications to container-based deployment model.

EDUCATION

MSc DevOps and Cloud Computing

University of Edinburgh

Edinburgh, United Kingdom

Graduated: September 2012

Grade: Distinction

BSc Computer Science

University of Glasgow

Glasgow, United Kingdom

Graduated: June 2010

Grade: Upper Second Class Honours

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP)

Container Orchestration: Kubernetes, Docker, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible, Puppet, Chef

CI/CD Platforms: Jenkins, GitLab CI, GitHub Actions, CircleCI

Monitoring and Logging: Prometheus, Grafana, ELK Stack, DataDog, New Relic, Splunk

Scripting Languages: Python, Bash, Go, Ruby

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB

Version Control: Git, GitHub, GitLab, Bitbucket

Operating Systems: Linux (CentOS, Ubuntu, Red Hat), Windows Server

Networking: TCP/IP, DNS, VPN, Load Balancing, VPC Configuration

Security: SSL/TLS, IAM, Vault, network segmentation, compliance frameworks (GDPR, ISO 27001)

CERTIFICATIONS

AWS Certified Solutions Architect Professional

Issued by Amazon Web Services

December 2021

Certified Kubernetes Administrator (CKA)

The Linux Foundation

August 2019

AWS Certified DevOps Engineer Professional

Issued by Amazon Web Services

May 2018
