PROFESSIONAL SUMMARY

Results-driven Staff Frontend Engineer with 14 years of proven track record in architecting and delivering cutting-edge web applications. Highly motivated to spearhead cross-functional collaboration and leverage innovative technologies to drive actionable insights. Champion of mission-critical projects through data-driven decision making, synergistically combining technical excellence with organisational objectives to deliver transformative solutions.

WORK EXPERIENCE

Staff Frontend Engineer

Synapse Data Ltd

<https://synapsedataltd.io>

Manchester, United Kingdom

March 2021 - Present

Architected and led the design of a scalable component library serving 12 frontend teams, reducing development time by 35% and improving consistency across 8 microservices

Spearheaded the migration of a monolithic React application to a micro-frontend architecture, enabling independent deployments and reducing bundle size by 48%

Mentored and managed a team of 5 junior and mid-level frontend engineers, conducting code reviews and establishing coding standards that improved code quality metrics by 42%

Implemented comprehensive performance optimisation strategies using React profiling and webpack analysis, achieving a 2.3 second reduction in Time to Interactive across all user-facing applications

Senior Frontend Engineer

Deloitte

<https://www.deloitte.com>

Manchester, United Kingdom

September 2016 - February 2021

Led the frontend development of a customer-facing dashboard platform built with Angular and TypeScript, serving over 500,000 users across multiple sectors

Designed and implemented a progressive web application strategy that increased mobile user engagement by 67% and reduced bounce rates significantly

Established automated testing frameworks using Jest and Cypress, increasing test coverage from 28% to 87% and reducing post-release defects by 53%

Collaborated with UX and product teams to deliver 6 major releases annually, each incorporating user feedback through A/B testing and analytics-driven improvements

Frontend Engineer

CloudVision Innovations Ltd

<https://cloudvisioninnovations.co>

Manchester, United Kingdom

June 2010 - August 2016

Developed responsive web interfaces using jQuery, Bootstrap, and vanilla JavaScript for a SaaS platform serving enterprise clients in the financial sector

Implemented RESTful API integrations and managed asynchronous data flows, improving application responsiveness and reducing API call overhead by 31%

Contributed to the adoption of front-end build tools including Webpack and Gulp, streamlining the development workflow and reducing build times from 45 seconds to 8 seconds

Participated in agile ceremonies and sprint planning, delivering features incrementally with 2-week sprint cycles while maintaining code quality standards

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

2006 - 2010

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python

Frontend Frameworks: React, Angular, Vue.js, Next.js

State Management: Redux, Vuex, MobX, Context API

Testing: Jest, React Testing Library, Cypress, Jasmine, Karma

Build Tools: Webpack, Vite, Gulp, Grunt, npm, yarn

Performance Optimisation: Lighthouse, Web Vitals, Code Splitting, Lazy Loading

Version Control: Git, GitHub, GitLab, Bitbucket

Accessibility: WCAG 2.1, Axe, Pa11y, keyboard navigation

CSS Frameworks: Tailwind CSS, SASS, Material Design, Bootstrap

Development Tools: VS Code, Chrome DevTools, Docker, Figma collaboration

Agile Methodologies: Scrum, Kanban, sprint planning
