PROFESSIONAL SUMMARY

Results-driven Senior Machine Learning Engineer with 7 years of experience designing and deploying scalable ML systems in production environments. Proven track record of developing end-to-end machine learning solutions that drive measurable business impact across healthcare, fintech, and e-commerce sectors. Strong expertise in building and leading technical teams, with a passion for translating complex business problems into elegant ML solutions. Currently seeking challenging opportunities to leverage deep learning and NLP expertise at forward-thinking organisations.

WORK EXPERIENCE

Senior Machine Learning Engineer

DataVault Systems Ltd

www.datavault.io

London, United Kingdom

March 2022 - Present

- Led development of customer segmentation platform processing 50 million daily events using ensemble methods and XGBoost, resulting in 22% improvement in marketing campaign ROI
- Architected real-time recommendation engine serving 200 requests per second with sub-100ms latency, increasing product discovery revenue by 18%
- Mentored team of 4 junior ML engineers on best practices for model validation, feature engineering, and experimentation frameworks
- Implemented comprehensive MLOps pipeline for model monitoring and automated retraining with custom Python frameworks and cloud infrastructure

Machine Learning Engineer

FinTech Innovations plc

www.fintech-innovations.co.uk

Cambridge, United Kingdom

July 2019 - February 2022

- Developed fraud detection models using deep learning and statistical methods that reduced false positives by 35% while maintaining 99.2% true positive rate
- Created feature store architecture handling 200+ features with automated data validation and quality checks across multiple data sources
- Conducted research on transformer-based models for transaction classification achieving 94% accuracy on imbalanced dataset with class weights optimisation
- Deployed 12 production models to AWS SageMaker serving credit scoring and anti-money-laundering use cases with quarterly model performance reviews

Machine Learning Scientist

Adaptive Analytics Co

www.adaptiveanalytics.net

Cambridge, United Kingdom

September 2017 - June 2019

- Built time series forecasting models for demand prediction using LSTM neural networks and statistical approaches, reducing inventory costs by 16%
- Developed data pipeline processing 2TB daily logs using Python, Pandas and SQL to create datasets for supervised learning tasks
- Implemented A/B testing framework to evaluate 8 different model architectures against production baseline with statistical significance testing
- Collaborated with product team to define 15 ML-driven features deployed to mobile application impacting 500k active users monthly

EDUCATION

Master of Science in Machine Learning

University of Cambridge

Cambridge, United Kingdom

2015 - 2017

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

2011 - 2015

SKILLS

Technical Skills: Python, Machine Learning, Deep Learning, TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM, Pandas, NumPy, SQL, AWS SageMaker, Feature Engineering, Model Validation, Kubernetes, Terraform, ArgoCD, Natural Language Processing, Computer Vision, Statistical Analysis, Time Series Analysis, Ensemble Methods, A/B Testing, Git, Docker, Apache Spark, Data Visualisation

Languages: English (Native), French (Intermediate)

CERTIFICATIONS

AWS Certified Machine Learning - Specialty, Amazon Web Services, 2021

Practical Deep Learning for Coders, fast.ai, 2018
