PROFESSIONAL SUMMARY

I am a results-driven Research Engineer with a proven track record of leveraging cutting-edge technologies to deliver actionable insights and drive organizational objectives. Highly motivated to spearhead innovative solutions through cross-functional collaboration and data-driven decision making. Passionate about delivering value through mission-critical research initiatives and synergistically championing dynamic technological advancement.

WORK EXPERIENCE

Research Engineer

TechCore Labs

Stockholm, Sweden

www.techcorelabs.io

June 2023 - Present

Conducted experimental validation of machine learning algorithms achieving 94% accuracy on classification tasks through systematic hyperparameter optimization and feature engineering techniques.

Developed Python-based data processing pipelines that reduced analysis time by 35% and enabled faster iteration cycles for the research team.

Collaborated with senior researchers to design and implement novel approaches for signal processing applications resulting in two technical reports submitted for peer review.

Supported documentation and presentation of research findings to stakeholders, contributing to quarterly progress reports and internal knowledge sharing sessions.

Junior Research Associate

Innovation Systems AB

Stockholm, Sweden

www.innovationsystems.se

February 2023 - May 2023

Assisted in the development of simulation frameworks for evaluating network performance metrics across distributed computing environments.

Performed statistical analysis on experimental datasets using R and Python to validate research hypotheses and identify significant patterns.

Participated in literature reviews and maintained organized databases of research papers and technical references for team accessibility.

Tested and debugged prototype software implementations while documenting issues and suggesting improvements to development workflows.

Internship Research Technician

Scandinavian Data Research Foundation

Stockholm, Sweden

www.scandinaviandrf.net

September 2022 - January 2023

Conducted preliminary experiments on data compression algorithms evaluating trade-offs between computational efficiency and output quality.

Maintained laboratory equipment and managed experimental datasets ensuring proper version control and backup procedures.

Assisted in preparation of research materials including code documentation, experimental logs, and technical specifications for internal reviews.

Participated in weekly team meetings and contributed observations from independent research tasks to broader project objectives.

EDUCATION

Master of Science in Information and Communication Technology

KTH Royal Institute of Technology

Stockholm, Sweden

2021 - 2023

Bachelor of Science in Computer Science

Uppsala University

Uppsala, Sweden

2018 - 2021

SKILLS

Programming Languages: Python, R, Java, SQL

Data Analysis: Statistical analysis, data visualization, pandas, numpy, matplotlib

Machine Learning: Scikit-learn, TensorFlow basics, model evaluation, hyperparameter tuning

Tools and Platforms: Git, Linux, Jupyter Notebook, MATLAB

Research Methods: Experimental design, literature review, technical documentation

Database Management: PostgreSQL, data organization and management

Communication: Technical writing, presentation skills, cross-team collaboration
