PROFESSIONAL SUMMARY

Experienced Principal Engineer with 10 years of progressive responsibility in designing and delivering scalable cloud infrastructure and distributed systems. Proven track record of leading technical teams through complex digital transformations and establishing engineering best practices across organisations. Strong background in DevOps, microservices architecture, and platform engineering with expertise in both legacy system modernisation and greenfield cloud-native development.

WORK EXPERIENCE

Principal Engineer

CloudScale Technologies

www.cloudscale.io

Glasgow, United Kingdom

March 2022 - Present

Led the architectural design and implementation of a multi-tenant SaaS platform serving 50+ enterprise clients with 99.99% uptime SLA. Established engineering standards, code review processes, and automated deployment pipelines reducing time-to-market by 40%. Managed a team of 8 engineers, conducting technical interviews and mentoring junior staff on system design principles. Implemented infrastructure-as-code using Terraform and HuggingFace Transformers for real-time data processing, improving model inference latency by 35%.

Senior DevOps Engineer

DataFlow Systems Ltd

www.dataflowsystems.co.uk

Glasgow, United Kingdom

August 2019 - February 2022

Designed and deployed containerised microservices architecture on Kubernetes, supporting 200+ daily deployments across development, staging, and production environments. Built comprehensive CI/CD pipelines using GitHub Actions and Jenkins, achieving 95% test coverage and reducing deployment failures by 60%. Implemented monitoring and observability solutions using Prometheus, Grafana, and ELK Stack across distributed systems. Led cloud migration project from on-premises data centres to AWS, resulting in 45% reduction in infrastructure costs and improved system reliability.

DevOps Engineer

TransactPoint Solutions

www.transactpoint.net

Edinburgh, United Kingdom

June 2017 - July 2019

Developed dbt data transformation workflows for analytics pipeline supporting business intelligence requirements across 15 departments. Managed Linux infrastructure across 100+ servers, implementing configuration management using Ansible and Chef. Automated routine maintenance tasks using Python and Bash scripting, reducing manual operational overhead by 50%. Configured and maintained PostgreSQL and MySQL databases

with automated backup and disaster recovery procedures ensuring zero data loss.

EDUCATION

BSc Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated June 2014

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container Technologies: Docker, Kubernetes, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI

Programming Languages: Python, Go, Bash, Java

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Monitoring and Logging: Prometheus, Grafana, ELK Stack, DataDog

Data Tools: dbt, Apache Spark, HuggingFace Transformers

Version Control: Git, GitLab, GitHub

Operating Systems: Linux, Windows Server
