PROFESSIONAL SUMMARY

Results-driven Senior Data Engineer with 6 years of progressive experience designing, building, and optimising large-scale data infrastructure and ETL pipelines. Proven expertise in cloud platforms, data warehousing, and modern analytics architectures. Skilled in translating complex business requirements into robust, scalable solutions whilst mentoring junior engineers and collaborating with cross-functional teams. Strong problem-solving ability with a track record of improving data quality, reducing pipeline latency, and enabling data-driven decision making across organisations.

WORK EXPERIENCE

Senior Data Engineer

Synapse Data Ltd

<https://synapsedataltd.io>

Manchester, United Kingdom

November 2021 - Present

Architected and deployed enterprise-grade data pipelines processing over 500GB daily across multiple cloud regions using Apache Spark and Airflow

Led migration of legacy batch processes to real-time streaming infrastructure utilising Kafka and Apache Flink, reducing reporting latency by 68%

Implemented comprehensive data quality framework with dbt and Great Expectations, improving data accuracy metrics from 89% to 99.2%

Mentored team of 3 junior data engineers on best practices, code review standards, and modern data stack technologies

Data Engineer

Sage Group plc

<https://www.sage.com>

Manchester, United Kingdom

January 2021 - March 2021

Designed and implemented cloud-native data warehouse on Google BigQuery handling 2TB of historical transaction data with sub-second query performance

Developed Python-based ETL orchestration platform utilising Apache Airflow, scheduling 150+ daily jobs across production environment

Optimised critical analytics dashboards reducing query execution time by 55% through strategic indexing and partition strategies

Collaborated with analytics and business intelligence teams to define data schemas and establish governance frameworks for 12 downstream reporting systems

Data Engineer

DataStream Analytics Inc

<https://datastreamanalytics.co>

Leeds, United Kingdom

August 2018 - December 2020

Built end-to-end data pipelines using HuggingFace Transformers for natural language processing of customer feedback at scale, processing 100K documents monthly

Established CI/CD infrastructure using GitHub Actions for automated testing and deployment of data transformation code across environments

Managed PostgreSQL and MySQL database administration, performance tuning, and backup strategies for operational analytics systems

Developed comprehensive monitoring and alerting systems using Prometheus and Grafana to track pipeline health and SLA compliance across 40+ production jobs

EDUCATION

MSc Data Science

University of Manchester

Manchester, United Kingdom

Graduated: September 2018

BSc Computer Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2017

TECHNICAL SKILLS

Data Platforms and Warehousing: Google BigQuery, Amazon Redshift, Snowflake, Delta Lake

Programming Languages: Python, SQL, Java, Scala

Big Data and Processing: Apache Spark, Apache Flink, Apache Kafka, Hadoop

Orchestration and Workflow: Apache Airflow, Prefect, dbt

Cloud Platforms: Google Cloud Platform, Amazon Web Services, Microsoft Azure

Databases: PostgreSQL, MySQL, MongoDB, Cassandra

Data Quality and Governance: Great Expectations, Apache Atlas

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Version Control: Git, GitLab, Bitbucket

Containerisation: Docker, Kubernetes

Development Practices: Agile, Test-Driven Development, Pair Programming

CERTIFICATIONS

Google Cloud Professional Data Engineer

Issued: March 2021

AWS Certified Solutions Architect Associate

Issued: November 2019
