PROFESSIONAL SUMMARY

Results-driven BI Analyst with 5 years of experience transforming complex data into actionable business insights. Proven expertise in data warehousing, ETL pipeline development, and dashboard creation using modern analytics platforms. Strong background in SQL optimization and business intelligence tools. Seeking to leverage technical skills and business acumen to drive data-informed decision making at enterprise level.

TECHNICAL SKILLS

Data Warehousing: Snowflake, Amazon Redshift, Google BigQuery

BI Tools: Tableau, Power BI, Looker, Qlik Sense

Programming Languages: SQL, Python, R

ETL Tools: Talend, Apache Airflow, Informatica

Databases: PostgreSQL, MySQL, Oracle, SQL Server

Cloud Platforms: AWS, Google Cloud Platform, Azure

Data Visualization: Advanced Tableau dashboards, interactive reporting

Version Control: Git, GitHub

Other: Excel (VBA), statistics, data modeling, dimensional modeling

WORK EXPERIENCE

Senior BI Developer

DataViz Solutions AG

<https://www.dataviz-solutions.io>

Zurich, Switzerland

March 2022 - Present

Designed and implemented enterprise-wide Tableau dashboards serving 150+ stakeholders across finance, sales, and operations departments, reducing report generation time by 65 percent. Optimized SQL queries and data warehouse architecture in Snowflake, improving dashboard load times from 45 seconds to 8 seconds. Led migration project from legacy business intelligence platform to Snowflake, managing data validation and ensuring zero downtime during transition. Mentored 2 junior BI analysts on best practices in data modeling, ETL development, and dashboard design principles.

BI Analyst

SynergyMetrics GmbH

<https://www.synergymetrics.ch>

Zurich, Switzerland

June 2020 - February 2022

Developed 25+ automated ETL pipelines using Apache Airflow to ingest data from multiple source systems including Salesforce, SAP, and Google Analytics into cloud data warehouse. Created comprehensive business intelligence reports and KPI dashboards using Power BI that tracked sales performance, customer acquisition costs, and product profitability metrics. Conducted data quality assessments and implemented validation rules that identified and resolved 40+ data integrity issues affecting downstream reporting accuracy. Collaborated with product and finance teams to define requirements and deliver customized analytical solutions within sprint cycles.

Junior BI Developer

TechInsights Solutions Ltd

<https://www.techinsights.net>

Zurich, Switzerland

August 2019 - May 2020

Built foundational data models and ETL processes using Talend to consolidate data from 8 different operational systems into centralized data warehouse. Created Qlik Sense dashboards and visualizations for executive team monitoring real-time business metrics and financial performance indicators. Performed ad-hoc SQL analysis and reporting to support business decisions during product launches and marketing campaigns. Documented data lineage, ETL processes, and dashboard specifications to maintain institutional knowledge and ensure scalability.

EDUCATION

Bachelor of Science in Business Information Technology

University of Zurich

Zurich, Switzerland

Graduated: June 2019

GPA: 3.7 / 4.0

GITHUB REPOSITORIES

<https://github.com/marcuschen-analytics/tableau-dashboard-templates>

Advanced Tableau workbook templates for common business scenarios including sales analytics, financial reporting, and customer behavior analysis.

<https://github.com/marcuschen-analytics/sql-optimization-scripts>

Collection of SQL query optimization techniques and performance tuning scripts for PostgreSQL and Snowflake environments.

<https://github.com/marcuschen-analytics/etl-pipeline-examples>

Sample ETL pipeline implementations using Python, Airflow, and Talend demonstrating best practices for data integration.

<https://github.com/marcuschen-analytics/bi-analytics-framework>

Reusable Python framework for automating common business intelligence tasks including data extraction, transformation, and validation.
