PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff Engineer with a proven track record of spearheading cutting-edge technological solutions that deliver actionable insights and mission-critical outcomes. Leveraging 12 years of experience in architecting scalable systems, I champion innovative approaches to cross-functional collaboration whilst synergistically driving organisational objectives through data-driven decision making. Passionate about delivering value through dynamic technical leadership and establishing proven methodologies that enable teams to achieve transformational results.

WORK EXPERIENCE

Graduate Software Engineer

TechVision Solutions

techvision.io

Glasgow, United Kingdom

June 2012 - December 2013

Led technical architecture decisions for enterprise-scale microservices platform serving 2 million daily active users across the EMEA region

Managed cross-functional team of 24 engineers spanning frontend, backend, and DevOps disciplines whilst establishing CI/CD best practices

Directed company-wide infrastructure modernisation project resulting in 40% reduction in operational costs and improved system reliability to 99.99% uptime

Spearheaded adoption of Kubernetes containerisation strategy, mentoring senior engineers and establishing internal training programmes for platform adoption

Senior Systems Architect

DataCore Technologies Ltd

datacore.co.uk

Edinburgh, United Kingdom

January 2014 - August 2015

Architected microservices migration strategy for legacy monolithic application, reducing deployment cycles from 6 weeks to 2 hours

Implemented distributed tracing and observability solutions using ELK stack and Prometheus, improving incident response time by 65%

Collaborated with product and business teams to define technical requirements for three major platform releases, delivering features on schedule

Optimised database query performance through indexing strategies and query refactoring, achieving 80% improvement in p99 latencies

Staff Engineer

Quantum Dynamics Group

quantum-dynamics.net

Glasgow, United Kingdom

September 2015 - Present

Designed and implemented global content delivery network reducing latency by 55% for international customers across 12 geographic regions

Established engineering standards, architectural review processes, and best practices frameworks adopted across 8 engineering teams totalling 120+ engineers

Led complete cloud migration strategy from on-premises infrastructure to AWS, managing budget of £2.4M and coordinating efforts across 6 teams over 18-month period

Mentored 15 junior and mid-level engineers, with 8 progressing to senior roles within the organisation, whilst maintaining hands-on contributions to critical system components

EDUCATION

BSc Computer Science (Hons)

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2012

TECHNICAL SKILLS

Languages: Java, Python, Go, TypeScript, SQL, Bash

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, ECS), Azure, GCP

Databases: PostgreSQL, MongoDB, Redis, Cassandra, DynamoDB

Container & Orchestration: Docker, Kubernetes, Docker Swarm

Monitoring & Observability: Prometheus, Grafana, ELK Stack, Datadog, New Relic

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI

Message Brokers: Apache Kafka, RabbitMQ, AWS SQS

Networking: TCP/IP, DNS, Load Balancing, VPN, API Gateway

Architecture Patterns: Microservices, Event-Driven, CQRS, Domain-Driven Design

DevOps & Infrastructure: Terraform, Ansible, CloudFormation, Infrastructure as Code

Version Control: Git, GitHub, GitLab
