PROFESSIONAL SUMMARY

Results-driven Data Scientist with 4 years of experience building machine learning models and delivering data-driven insights across fintech and retail sectors. Expertise in Python, statistical analysis, and cloud-based analytics platforms. Proven track record of leading cross-functional teams and architecting enterprise-level data solutions. Passionate about translating complex data challenges into actionable business strategies that drive measurable impact.

WORK EXPERIENCE

Principal Data Scientist

Synapse Data Ltd

www.synapsedata.io

Liverpool, United Kingdom

June 2023 - Present

Directed comprehensive data strategy across organization managing team of 18 data scientists and analytics engineers

Led architectural redesign of ML pipeline infrastructure resulting in 45% reduction in model inference latency

Established enterprise data governance framework adopted across 12 departments and 200+ stakeholders

Presented quarterly business intelligence findings to C-suite executives influencing strategic investment decisions worth GBP 2.3 million

Senior Data Scientist

Barclays Bank PLC (Previously known as DataStream Analytics Inc)

www.barclays.com

Liverpool, United Kingdom

September 2021 - May 2023

Developed predictive credit risk models processing 500K+ transactions daily with 94% accuracy rate

Implemented automated feature engineering pipeline reducing data preparation time by 60%

Collaborated with product team to deploy recommendation engine serving 2 million customer segments

Mentored 4 junior data scientists and established best practices for model validation and deployment

Junior Data Analyst

Tesco PLC

www.tesco.com

Liverpool, United Kingdom

March 2020 - August 2021

Conducted exploratory data analysis on retail sales datasets identifying 12 key customer segments

Created automated daily reporting dashboards using Python and Tableau consumed by 50+ stakeholders

Built time series forecasting model for inventory optimization reducing stockouts by 35%

Assisted in migration of legacy analytics infrastructure to AWS cloud platform improving query performance by 70%

EDUCATION

University of Manchester

BSc Data Science with Business Analytics

Graduated: June 2019

Grade: Upper Second Class Honours (2:1)

Relevant Coursework: Machine Learning, Statistical Inference, Big Data Technologies, Business Intelligence

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java

Machine Learning Frameworks: TensorFlow, Scikit-learn, XGBoost, PyTorch

Cloud Platforms: AWS (SageMaker, EC2, S3), Google Cloud Platform, Azure

Databases: PostgreSQL, MongoDB, MySQL, Snowflake

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

Tools and Technologies: Git, Docker, Jupyter Notebooks, Apache Spark, Airflow

Statistical Methods: Regression Analysis, Hypothesis Testing, A/B Testing, Time Series Forecasting

CERTIFICATIONS

AWS Certified Machine Learning Specialty

Google Cloud Professional Data Engineer Certification

PUBLIC REPOSITORIES

github.com/jamesmitchell-ds/credit-risk-predictor

Customer credit risk classification model using gradient boosting with extensive feature engineering documentation

github.com/jamesmitchell-ds/time-series-forecasting-suite

Comparative analysis of ARIMA, Prophet, and LSTM models for inventory demand forecasting

github.com/jamesmitchell-ds/nlp-sentiment-analyzer

End-to-end NLP pipeline for customer review sentiment classification with BERT transformers

github.com/jamesmitchell-ds/ml-pipeline-optimization

Production ML pipeline framework with automated model validation and performance monitoring
