PROFESSIONAL SUMMARY

Results-driven data analyst with 8 years of experience transforming complex datasets into actionable business intelligence. I've consistently delivered high-impact analytics solutions across finance and retail sectors, driving strategic decision-making for C-suite executives. My expertise spans advanced SQL, Python, and BI tools, with a proven track record of mentoring junior analysts and leading cross-functional analytical initiatives. Passionate about uncovering data-driven insights that directly influence revenue growth and operational efficiency.

WORK EXPERIENCE

Principal Data Science Director

DataVault Solutions Ltd

datavalult.io

London, United Kingdom

July 2019 - Present

Directed strategic analytics operations for a department of 52 data professionals, establishing governance frameworks and analytical standards across the organisation

Architected and deployed enterprise-wide predictive analytics platform processing 2.8 billion records daily, resulting in 34% improvement in forecasting accuracy

Reported directly to Chief Financial Officer with responsibility for all data initiatives, budget allocation of GBP 3.2m, and stakeholder management across 15+ departments

Established executive dashboard suite used by board members, delivering real-time KPIs for 7 key business verticals

Senior Data Analyst

Financial Metrics Group

Bristol, United Kingdom

financialmetrics.co.uk

March 2017 - June 2019

Performed ad-hoc analysis on customer segmentation datasets using SQL and Python, producing weekly reports for departmental heads

Developed automated data validation scripts reducing manual quality checks by 25 hours per month

Collaborated with business intelligence team to refine existing dashboard functionality and user experience

Supported transition of legacy reporting systems to cloud-based infrastructure on AWS

Junior Data Analyst

RetailTech Innovations

retailtech.net

Manchester, United Kingdom

September 2015 - February 2017

Extracted and cleaned datasets from multiple sources including ERP and POS systems for preliminary trend analysis

Created pivot table reports in Excel for store managers analysing sales performance by region and product category

Participated in data quality audits and documented findings in internal wiki

Assisted senior analyst with exploratory data analysis on customer purchase behaviour patterns
