PROFESSIONAL SUMMARY

Results-driven Data Scientist with 1 year of hands-on experience in building predictive models and deriving actionable insights from complex datasets. Proficient in Python, SQL, and machine learning frameworks with a strong foundation in statistical analysis. Seeking to leverage analytical skills and technical expertise to solve challenging business problems and contribute to data-driven decision making in a collaborative environment.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R

Machine Learning: Scikit-learn, TensorFlow, XGBoost, Linear Regression, Classification Models

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn

Databases: PostgreSQL, MySQL

Tools and Platforms: Jupyter Notebook, Git, Google Cloud Platform, Tableau

Statistical Methods: Hypothesis Testing, A/B Testing, Time Series Analysis

Data Visualization: Matplotlib, Seaborn, Tableau

WORK EXPERIENCE

Data Scientist

TechVision Analytics

www.techvision-analytics.io

Oxford, United Kingdom

June 2023 - Present

Developed and deployed 5 predictive models using Python and scikit-learn for customer churn prediction, achieving 87% accuracy and identifying high-risk segments

Conducted exploratory data analysis on 2 million+ customer records using Pandas and SQL to uncover key business insights driving a 12% improvement in retention

Collaborated with cross-functional teams to design and implement A/B testing framework, analyzing results for 8+ marketing campaigns with statistical rigor

Created interactive Tableau dashboards to visualize model performance metrics and KPIs, enabling stakeholders to monitor real-time business outcomes

Data Analyst Intern

Insight Data Solutions (Previously known as DataFlow Metrics Ltd)

www.insightdata.co.uk

Reading, United Kingdom

February 2023 - May 2023

Performed data cleaning and preprocessing on structured and unstructured datasets using Python, improving data quality by 34%

Built SQL queries to extract and aggregate data from multiple databases for weekly reporting requirements

Assisted senior analysts in feature engineering for machine learning models, contributing to 3 production-ready datasets

Presented data visualizations and trend analysis to business stakeholders during monthly review meetings

Junior Data Analyst

Quantum Insights Ltd

www.quantum-insights.net

London, United Kingdom

September 2022 - January 2023

Analyzed large datasets using SQL and Python to support operational decision-making across 4 business units

Created automated reporting scripts reducing manual data compilation time by 8 hours per week

Participated in model development lifecycle including data preparation, feature selection, and model validation

Documented data processes and best practices to maintain team knowledge base and ensure reproducibility

EDUCATION

Bachelor of Science in Computer Science with specialization in Data Science

University of Oxford

Oxford, United Kingdom

Graduated: June 2022

Grade: 2:1 Honours

GITHUB REPOSITORIES

github.com/jamesmitchell-data/churn-prediction-model

Predictive model for customer churn using XGBoost and feature engineering techniques

github.com/jamesmitchell-data/sentiment-analysis-nlp

Natural Language Processing project analyzing customer reviews with VADER and LSTM models

github.com/jamesmitchell-data/time-series-forecasting

Time series analysis and forecasting for sales data using ARIMA and Prophet

github.com/jamesmitchell-data/data-cleaning-pipeline

Automated ETL pipeline for data cleaning and transformation using Pandas and SQL
