PROFESSIONAL SUMMARY

Senior DevOps Engineer with 8 years of progressive experience designing and maintaining scalable infrastructure solutions across cloud and on-premise environments. Proven track record of automating deployment pipelines, reducing operational overhead, and leading cross-functional teams in high-growth technology companies. Strong expertise in containerization, Kubernetes orchestration, and infrastructure-as-code practices. Passionate about building reliable systems that enable development teams to ship code confidently.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudFormation), Azure (VMs, App Service, DevOps), Google Cloud Platform

Container & Orchestration: Docker, Kubernetes, Helm, Docker Compose

Infrastructure as Code: Terraform, Ansible, CloudFormation, Pulumi

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI, ArgoCD

Programming & Scripting: Python, Bash, Go, Ruby

Monitoring & Logging: Prometheus, Grafana, ELK Stack, Datadog, New Relic

Databases: PostgreSQL, MySQL, MongoDB, Redis

Version Control: Git, GitHub, GitLab

Container Registries: Docker Hub, AWS ECR, Azure ACR, Harbor

Operating Systems: Linux (CentOS, Ubuntu, Debian), Windows Server

Networking: VPC, Load Balancing, DNS, SSL/TLS, Nginx, Apache

WORK EXPERIENCE

Senior DevOps Engineer

TechVault Solutions

<https://techvaultsolutions.io>

Lisbon, Portugal

March 2021 - Present

Led infrastructure modernization initiative migrating 15+ legacy applications to Kubernetes, reducing deployment time by 65 percent and improving system reliability to 99.95 percent uptime.

Designed and implemented comprehensive CI/CD pipelines using GitLab CI and ArgoCD, enabling 50+ deployments per day across development, staging, and production environments.

Mentored team of 4 junior DevOps engineers and conducted training sessions on Kubernetes, Terraform, and infrastructure best practices, resulting in improved code quality and faster onboarding.

Established monitoring and alerting infrastructure using Prometheus and Grafana, reducing mean time to resolution for incidents by 40 percent through proactive threshold-based alerts.

DevOps Engineer

Innovate Cloud Services

<https://innovatecloudservices.net>

Lisbon, Portugal

June 2018 - February 2021

Provisioned and managed AWS infrastructure for 8 microservices-based applications using Terraform and CloudFormation, supporting 2 million daily active users with consistent performance.

Automated server deployment and configuration management using Ansible, reducing manual setup time from 4 hours to 15 minutes and eliminating human error in production environments.

Implemented Docker containerization strategy across development and production, improving application portability and reducing environment-related bugs by 55 percent.

Collaborated with security team to implement infrastructure hardening standards, conducting vulnerability assessments and achieving SOC 2 compliance certification.

DevOps Engineer

Mobix Portugal

<https://www.mobix.pt>

Lisbon, Portugal

July 2016 - May 2018

Managed on-premise infrastructure consisting of 40+ physical and virtual servers running critical business applications serving 500,000+ users across Portuguese market.

Developed Bash and Python scripts for system automation, backup procedures, and log analysis, reducing operational manual tasks by 35 percent and improving system stability.

Implemented monitoring solutions using Nagios and custom alerting systems, providing visibility into system performance and enabling faster incident response.

Participated in disaster recovery planning and executed quarterly drills to ensure business continuity, achieving RTO of 4 hours and RPO of 1 hour for critical systems.

EDUCATION

Bachelor of Science in Computer Science and Engineering

Instituto Superior Tecnico, University of Lisbon

Lisbon, Portugal

Graduated: June 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

Linux Foundation, 2022

AWS Certified Solutions Architect Professional

Amazon Web Services, 2021

HashiCorp Certified Terraform Associate

HashiCorp, 2020

GITHUB REPOSITORIES

kubernetes-automation-toolkit

<https://github.com/mariorafa/kubernetes-automation-toolkit>

Collection of Helm charts and Kubernetes manifests for automated multi-environment deployment pipelines with GitOps workflows.

terraform-aws-infrastructure

<https://github.com/mariorafa/terraform-aws-infrastructure>

Modular Terraform modules for provisioning production-grade AWS infrastructure including networking, compute, and database resources.

ci-cd-pipeline-templates

<https://github.com/mariorafa/ci-cd-pipeline-templates>

Reusable GitLab CI and GitHub Actions templates for microservices deployment with automated testing and security scanning.

docker-optimization-guide

<https://github.com/mariorafa/docker-optimization-guide>

Best practices documentation and optimized Dockerfile examples for building efficient containerized applications with minimal image sizes.
