Location: Amsterdam, Netherlands

PROFESSIONAL SUMMARY

Results-driven Machine Learning Engineer with 2 years of hands-on experience developing and deploying ML models in production environments. Strong foundation in Python, data preprocessing, and model optimization with a track record of delivering insights that drive business value. Passionate about solving complex problems through machine learning and committed to continuous learning in this rapidly evolving field.

WORK EXPERIENCE

Machine Learning Engineer

DataFlow Technologies

Amsterdam, Netherlands

January 2023 - Present

www.dataflow-tech.io

Developed and deployed 5+ machine learning models for customer segmentation and churn prediction, improving retention by 18 percent

Implemented automated data pipelines using Python and Apache Airflow to process 2GB+ of daily customer data

Conducted A/B testing on model recommendations, resulting in 12 percent increase in user engagement

Collaborated with product team to define success metrics and translated business requirements into technical specifications

Data Scientist

Precision Analytics Group (Previously known as SynergyAI Solutions)

Rotterdam, Netherlands

June 2022 - December 2022

www.precisionanalytics.com

Built classification models using scikit-learn and TensorFlow to predict equipment failures with 94 percent accuracy

Performed exploratory data analysis on sensor data from 150+ industrial devices using Pandas and Matplotlib

Optimized hyperparameters through grid search and cross-validation, reducing model inference time by 40 percent

Documented model architecture and created reproducible training pipelines for team knowledge transfer

Junior Machine Learning Developer

TechVenture Labs

Amsterdam, Netherlands

September 2021 - May 2022

www.techventurelabs.co

Assisted in preprocessing and cleaning datasets containing 500K+ records using Python and SQL

Trained baseline regression and classification models for various proof-of-concept projects
Participated in code reviews and contributed to improving model documentation standards
Supported senior engineers in deploying Flask-based APIs for model serving in development environment

EDUCATION

Master of Science in Data Science

University of Amsterdam

Amsterdam, Netherlands

Graduated: June 2021

Thesis: Deep Learning Approaches for Time Series Forecasting in Financial Markets

Bachelor of Science in Computer Science

University of Amsterdam

Amsterdam, Netherlands

Graduated: June 2019

TECHNICAL SKILLS

Programming Languages: Python, SQL, Bash

Machine Learning: Scikit-learn, TensorFlow, Keras, XGBoost, LightGBM

Data Processing: Pandas, NumPy, Apache Spark

Tools and Platforms: Jupyter Notebook, Git, Docker, AWS (EC2, S3), Google Cloud Platform

Databases: PostgreSQL, MongoDB

Visualization: Matplotlib, Seaborn, Plotly

Other: REST APIs, Linux, Model Evaluation and Validation

LANGUAGES

Dutch (Native)

English (Fluent)

German (Intermediate)
