PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 5 years of hands-on expertise in cloud infrastructure, containerisation, and continuous integration/deployment pipelines. Proven track record of designing and implementing scalable solutions that improve system reliability and reduce deployment times. Strong proficiency in AWS, Kubernetes, and infrastructure-as-code tools. Committed to automating operational processes and mentoring junior team members to achieve organisational goals.

WORK EXPERIENCE

DevOps Engineer

CloudScale Solutions Ltd

cloudscalesolutions.io

Bristol, United Kingdom

September 2021 - Present

Architected and deployed containerised microservices infrastructure using Kubernetes, reducing application deployment time from 45 minutes to 12 minutes across multiple environments.

Implemented comprehensive CI/CD pipelines using Jenkins and GitLab CI, enabling 50+ deployments per week with zero-downtime release strategies.

Designed and maintained AWS infrastructure spanning EC2, RDS, S3, and CloudFront, optimising costs by 35% through reserved instances and auto-scaling policies.

Established monitoring and alerting systems using Prometheus and Grafana, improving mean time to detection of critical issues from 30 minutes to under 5 minutes.

Infrastructure Engineer

TechVenture Digital

techventuredigital.co

Bristol, United Kingdom

January 2021 - August 2021

Migrated on-premises applications to AWS cloud infrastructure, managing 20+ virtual machines and reducing monthly infrastructure costs by 40%.

Automated infrastructure provisioning using Terraform and CloudFormation, reducing manual configuration errors by 90% and provisioning time from days to hours.

Developed and maintained Python scripts for infrastructure monitoring and automated remediation of common operational issues.

Collaborated with development teams to implement Docker containerisation for legacy applications, improving deployment consistency and reducing environment-related bugs by 25%.

Junior DevOps Engineer

Accenture

accenture.com

London, United Kingdom

June 2019 - March 2021

Supported Linux and Windows server administration across 200+ production and non-production systems, maintaining 99.95% uptime.

Implemented backup and disaster recovery procedures using Veeam and AWS S3, achieving RPO of 4 hours and RTO of 2 hours.

Assisted in designing and deploying CI/CD infrastructure using Apache Jenkins, supporting 15+ development teams and 50+ daily build pipelines.

Created comprehensive infrastructure documentation and runbooks, reducing incident resolution time and improving team knowledge sharing.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2019

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, RDS, S3, CloudFront, Lambda, VPC), Azure (Virtual Machines, App Service)

Container Orchestration: Kubernetes, Docker, Docker Compose, Helm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI/CD, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch

Programming Languages: Python, Bash, YAML

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (Ubuntu, CentOS, Amazon Linux), Windows Server

Other Tools: Nginx, Apache, Vagrant, Datadog
