PROFESSIONAL SUMMARY

Results-driven Machine Learning Engineer with 4 years of proven track record in spearheading cutting-edge AI initiatives and delivering actionable insights through data-driven decision making. Highly motivated professional committed to leveraging mission-critical technologies to champion innovative solutions and synergistically drive organisational objectives. Passionate about cross-functional collaboration and harnessing advanced analytics to unlock transformative business value. Dynamic problem solver dedicated to executing scalable machine learning architectures that empower stakeholders with intelligence for strategic advantage.

TECHNICAL SKILLS

Machine Learning: TensorFlow, PyTorch, Scikit-learn, XGBoost, LSTM, CNN, NLP

Programming Languages: Python, SQL, Java, R

Data Processing: Pandas, NumPy, PySpark, Apache Spark

Cloud Platforms: AWS (SageMaker, EC2, S3), Google Cloud Platform, Azure ML

Data Visualization: Matplotlib, Seaborn, Tableau, PowerBI

Databases: PostgreSQL, MongoDB, Cassandra, Elasticsearch

MLOps: Docker, Kubernetes, MLflow, CI/CD pipelines

Deep Learning: Computer Vision, Natural Language Processing, Recommender Systems

Tools: Git, Jupyter Notebook, Apache Airflow, Weights and Biases

WORK EXPERIENCE

Machine Learning Engineer

DataFlow Systems Ltd

London, United Kingdom

dataflowsystems.io

January 2022 - Present

Architected and deployed 3 end-to-end machine learning pipelines processing 500GB+ of daily transaction data, reducing model inference latency by 45% and enabling real-time fraud detection across 2 million users

Implemented advanced NLP models using transformer-based architectures to automate customer sentiment analysis, improving support team efficiency by 38% and identifying 12 high-impact product improvement opportunities

Optimised model performance through systematic hyperparameter tuning and ensemble techniques, achieving 94.3% accuracy on binary classification tasks and increasing model robustness across edge cases

Led cross-functional collaboration with product and data engineering teams to establish MLOps best practices, reducing model deployment time from 3 weeks to 4 days through containerisation and automated testing frameworks

Senior Data Scientist

Insight Analytics Group
London, United Kingdom
insightanalyticsgroup.net

June 2020 - December 2021

Developed predictive churn models leveraging gradient boosting and survival analysis, accurately forecasting customer attrition 90 days in advance with 91% precision, enabling proactive retention strategies

Engineered feature engineering pipelines using Spark to process 2TB monthly datasets, creating 450+ engineered features that improved model performance across 8 concurrent projects

Mentored 2 junior analysts on machine learning fundamentals and best practices, establishing weekly knowledge-sharing sessions that accelerated team capability maturity

Collaborated with stakeholders to translate business requirements into technical specifications, delivering 6 machine learning solutions that directly contributed GBP 2.3M revenue impact

Data Scientist

TechVenture Innovations
London, United Kingdom
techventure.co

July 2019 - May 2020

Built and validated machine learning prototypes using scikit-learn and TensorFlow to solve 5 distinct business problems, achieving 85%+ accuracy on test datasets

Conducted exploratory data analysis on 10+ datasets containing 500M+ records, identifying key patterns and anomalies that informed strategic business decisions

Implemented A/B testing frameworks to validate model performance in production environments, ensuring statistical significance and generating actionable insights for stakeholder decision-making

Documented technical findings and created 12 data visualisations for executive presentations, translating complex model outputs into digestible business narratives for non-technical audiences

EDUCATION

MSc Data Science
University of Manchester
Manchester, United Kingdom
Graduated: September 2019
Distinction

BSc Computer Science
University of Edinburgh
Edinburgh, United Kingdom
Graduated: June 2017
Upper Second Class Honours

GITHUB REPOSITORIES

[jmitchell-ml/transformer-sentiment-analysis](#)

Transformer-based NLP model for multi-class sentiment classification achieving 93% accuracy on benchmark datasets with comprehensive documentation and training pipeline

[jmitchell-ml/fraud-detection-ensemble](#)

Production-ready ensemble machine learning system combining XGBoost and LightGBM for real-time fraud detection with monitoring dashboards and deployment scripts

[jmitchell-ml/time-series-forecasting](#)

LSTM neural networks for multivariate time series forecasting with hyperparameter optimisation and performance benchmarking against classical statistical methods

[jmitchell-ml/recommendation-engine](#)

Collaborative filtering recommendation system using matrix factorisation and neural collaborative filtering techniques with evaluation metrics and A/B testing framework
