PROFESSIONAL SUMMARY

I am a mid-level software engineer with 5 years of professional experience building scalable web applications and backend systems. I have a strong foundation in full-stack development with particular expertise in Python and JavaScript across various industries. I'm passionate about writing clean, maintainable code and collaborating with cross-functional teams to deliver high-quality solutions that meet business objectives.

WORK EXPERIENCE

Senior Software Engineer

TechFlow Solutions Ltd

<https://www.techflowsolutions.io>

Bristol, United Kingdom

March 2022 - Present

Designed and implemented a microservices architecture using Python and FastAPI that reduced API response times by 40% and improved system scalability for 2 million+ monthly active users

Led a team of 2 junior developers on the development of customer-facing features, conducting code reviews and providing mentorship on best practices and design patterns

Implemented automated testing suite with pytest and increased code coverage from 62% to 88% across the main codebase

Optimized PostgreSQL database queries and implemented Redis caching layer, reducing database load by 35% during peak traffic periods

Software Engineer

Digitech Ventures

<https://www.digitechventures.co>

Bath, United Kingdom

June 2020 - February 2022

Developed RESTful APIs in Node.js and Express that served 50+ third-party integrations, handling over 10 million requests per month with 99.9% uptime

Built responsive front-end interfaces using React and TypeScript, improving user engagement metrics by 28% across key product pages

Collaborated with product managers and UX designers to translate business requirements into technical specifications and user stories

Deployed applications to AWS infrastructure using Docker containers and managed infrastructure-as-code using CloudFormation templates

Junior Software Engineer

Innovate Digital

<https://www.innovatedigital.net>

Bristol, United Kingdom

August 2019 - May 2020

Contributed to full-stack development of internal tools and customer-facing web applications using Python Django and jQuery

Fixed bugs and implemented feature requests identified during QA testing, maintaining a 95% resolution rate within sprint cycles

Participated in daily stand-ups and sprint planning ceremonies, ensuring alignment with team objectives and project timelines

Wrote unit tests and integration tests to validate functionality, improving code reliability and reducing post-deployment defects

EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2019

Grade: 2:1 (Upper Second Class Honours)

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS, Java

Backend Frameworks: FastAPI, Django, Express.js, Spring Boot

Frontend Frameworks: React, Vue.js

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Google Cloud Platform

DevOps & Infrastructure: Docker, AWS CloudFormation, Kubernetes, Terraform, ArgoCD, GitLab CI/CD, GitHub Actions

Tools & Version Control: Git, Jira, Confluence, Visual Studio Code, IntelliJ IDEA

Testing: pytest, Jest, Mocha, Chai

PUBLIC REPOSITORIES

github.com/jamesmitchell92/ecommerce-api - Python FastAPI project implementing REST API for e-commerce platform

github.com/jamesmitchell92/react-dashboard - React-based analytics dashboard with data visualization

github.com/jamesmitchell92/weather-app - Full-stack weather application using Node.js and React

github.com/jamesmitchell92/task-manager - Django-based task management system with PostgreSQL backend
