## PROFESSIONAL SUMMARY

---

Experienced Staff Backend Engineer with 14 years of progressive experience designing and implementing scalable distributed systems. Specialized in cloud architecture, microservices, and high-performance database optimization. Known for mentoring junior engineers and driving technical excellence across multiple teams. Passionate about building robust systems that can handle millions of concurrent users while maintaining code quality and team velocity.

## WORK EXPERIENCE

---

Staff Backend Engineer

Cloudshift Technologies

[www.cloudshift.io](https://www.cloudshift.io)

Stockholm, Sweden

March 2021 - Present

Led the architecture and implementation of a distributed payment processing system handling 2 million daily transactions across Nordic markets. Mentored a team of 8 engineers on microservices best practices and code review standards. Reduced database query latency by 65% through query optimization and Redis caching strategies. Designed and deployed a multi-region disaster recovery solution achieving 99.99% uptime SLA.

Senior Backend Engineer

Nexus Digital Solutions AB

[www.nexusdigital.se](https://www.nexusdigital.se)

Stockholm, Sweden

June 2016 - February 2021

Architected a real-time data pipeline processing 50TB of daily analytics data using Apache Kafka and Scala. Implemented comprehensive monitoring and alerting infrastructure using Prometheus and Grafana across 300+ microservices. Reduced API response times by 40% through database sharding and connection pooling optimization. Mentored 5 junior developers and established backend coding standards adopted across the organization.

Backend Engineer

DataVault Systems

[www.datavault.io](https://www.datavault.io)

Malmö, Sweden

January 2010 - May 2016

Developed core backend services for a cloud-based data management platform serving enterprise clients. Implemented automated testing framework increasing code coverage from 35% to 92%. Optimized batch processing jobs reducing nightly job execution time from 8 hours to 2 hours. Collaborated with DevOps team to establish CI/CD pipelines using Jenkins and Docker.

## EDUCATION

---

Master of Science in Computer Science

Royal Institute of Technology (KTH)

Stockholm, Sweden

Graduated: 2009

Bachelor of Science in Computer Science

Uppsala University

Uppsala, Sweden

Graduated: 2007

## **SKILLS**

---

Languages: Java, Python, Go, Scala, SQL, Bash

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Cassandra

Cloud Platforms: AWS, Google Cloud Platform, Azure

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

Frameworks: Spring Boot, FastAPI, gRPC, Django

DevOps Tools: Docker, Kubernetes, Terraform, Jenkins, GitHub Actions

Monitoring: Prometheus, Grafana, ELK Stack, New Relic

Other: Microservices Architecture, System Design, REST APIs, Event-Driven Systems, Load Balancing
