PROFESSIONAL SUMMARY

Results-driven BI Analyst with 4 years of hands-on experience designing and implementing business intelligence solutions for mid-market organizations. Skilled in data warehousing, ETL processes, and creating actionable dashboards that drive strategic decision-making. Strong technical foundation in SQL, Python, and visualization tools combined with excellent stakeholder management abilities. Proven track record of optimizing data pipelines and reducing reporting turnaround times by up to 40%.

WORK EXPERIENCE

Senior BI Analyst

DataViz Solutions Ltd

<https://www.dataviz-solutions.io>

Manchester, United Kingdom

September 2022 - Present

- Developed and maintained 25+ interactive Power BI dashboards serving C-suite executives and departmental heads, resulting in 35% faster decision-making cycles
- Optimized ETL pipelines using dbt to reduce data processing time from 4 hours to 45 minutes, improving daily reporting delivery schedules
- Designed a new data warehouse schema in Snowflake that improved query performance by 50% and reduced infrastructure costs by 18%
- Mentored 2 junior analysts on best practices in SQL optimization, data modeling, and dashboard design methodologies

BI Analyst

Insight Analytics Group

<https://www.insightanalytics.net>

Manchester, United Kingdom

March 2021 - August 2022

- Created 15 complex SQL queries and stored procedures supporting monthly financial reconciliation processes for 8 departments
- Built automated reporting solutions in Tableau that eliminated 20+ hours of manual data compilation per month
- Collaborated with business stakeholders to gather requirements and translate them into technical specifications for 12 dashboard projects
- Conducted data quality assessments and implemented validation rules that identified and corrected 500+ data inconsistencies across enterprise systems

Junior BI Analyst

Northern Data Consultants

<https://www.northerndataconsult.co>

Leeds, United Kingdom

June 2020 - February 2021

- Supported the development and deployment of 8 new Power BI reports for the finance and operations divisions
- Wrote and tested SQL queries against Oracle databases to extract customer metrics and sales performance data
- Assisted in the migration of legacy reporting systems to modern cloud-based solutions using GitHub Actions for continuous deployment
- Documented data lineage and created technical specifications for data dictionary maintenance supporting 30+ stakeholders
