PROFESSIONAL SUMMARY

Experienced Full Stack Engineer with 5 years of progressive experience building scalable web applications and cloud-based solutions. Proficient in modern frontend frameworks and backend technologies with a strong track record of delivering features that improve user engagement and system performance. Passionate about writing clean, maintainable code and collaborating with cross-functional teams to solve complex technical challenges. Currently based in Lisbon with expertise spanning React, Node.js, and cloud infrastructure.

WORK EXPERIENCE

Full Stack Engineer

TechVision Solutions, Lisbon, Portugal

<https://www.techvisionsolutions.io>

January 2023 - Present

Developed and maintained microservices architecture supporting over 500K daily active users using Node.js and Express

Implemented React-based frontend components with Redux state management resulting in 40% improvement in page load times

Designed and optimized PostgreSQL database schemas, reducing query execution times by 35% through indexing and query optimization

Collaborated with product and design teams to translate requirements into technical specifications and delivered features on schedule

Senior Full Stack Developer

DataFlow Innovations, Lisbon, Portugal

<https://www.dataflow-innovations.net>

January 2021 - December 2022

Led development of real-time data visualization dashboard using React and D3.js for financial analytics platform

Built and deployed containerized applications using Docker and Kubernetes, reducing infrastructure costs by 25%

Implemented HuggingFace Transformers for natural language processing features to enhance search capabilities across the platform

Mentored junior developers on coding standards, code review processes, and best practices for full stack development

Full Stack Engineer

Cloudbase Systems

<https://www.cloudbase-systems.com>

March 2019 - December 2020

Architected and developed RESTful APIs using Python Flask and integrated with AWS services including Lambda, RDS, and S3

Implemented automated testing pipelines with GitHub Actions to catch regressions and improve code quality before production deployment

Built responsive user interfaces using Vue.js and implemented real-time updates through WebSocket connections
Optimized application performance through caching strategies, CDN integration, and database query optimization

EDUCATION

Bachelor of Science in Computer Science

Instituto Superior Tecnico, Universidade de Lisboa, Lisbon, Portugal

2016 - 2019

TECHNICAL SKILLS

Frontend: React, Vue.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Redux, Webpack

Backend: Node.js, Express, Python, Flask, RESTful APIs, GraphQL, Microservices

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Linux

Tools & Platforms: Git, Jira, Agile, HuggingFace Transformers, GitHub Actions

Other: Web Performance Optimization, System Design, Database Design
