PROFESSIONAL SUMMARY

Results-driven Senior Data Analyst with 6 years of progressive experience in transforming complex datasets into actionable insights. Highly motivated professional with a proven track record of spearheading cutting-edge analytics initiatives that drive mission-critical business decisions. Passionate about leveraging data-driven methodologies to champion organisational objectives and synergistically collaborate across cross-functional teams. Committed to delivering innovative solutions that generate measurable value and support dynamic strategic planning.

WORK EXPERIENCE

Senior Data Analyst

Quantivate Analytics

www.quantivate.io

Cambridge, United Kingdom

March 2022 - Present

Developed and maintained 15+ automated reporting dashboards using Tableau and Power BI, reducing monthly reporting time by 40% and enabling leadership to make faster data-driven decisions across five departments. Designed and implemented a comprehensive data quality framework that identified and resolved critical data inconsistencies, improving overall data accuracy from 91% to 98.5% and instilling confidence in stakeholder reporting. Led cross-functional collaboration with product, marketing, and finance teams to define KPIs and metrics, resulting in a unified measurement framework adopted across the entire organisation. Mentored three junior analysts on SQL optimisation and statistical analysis techniques, improving team capability and contributing to career progression of direct reports.

Data Analyst

Nexus Intelligence Ltd

www.nexus-intelligence.co

London, United Kingdom

June 2020 - February 2022

Performed advanced statistical analysis on customer behavioural datasets comprising 2 million+ records, identifying key segmentation opportunities that informed targeted marketing campaigns with 34% higher conversion rates than previous approaches. Constructed and optimised SQL queries to extract data from enterprise data warehouse, reducing query execution time by 55% and enabling faster analysis cycles for stakeholders. Collaborated with data engineering team to build ETL pipelines for real-time customer analytics, consolidating data from seven disparate sources and providing single source of truth for business intelligence team. Created comprehensive documentation and training materials for 12 business users on new analytics platform, achieving 95% adoption within four weeks.

Junior Data Analyst

DataStream Solutions

www.datastream-solutions.net

Cambridge, United Kingdom

July 2018 - May 2020

Analysed sales and operational data to identify trends and inefficiencies, presenting findings to senior management through monthly business reviews and supporting investment decisions worth GBP 2.3 million. Developed Python scripts to automate manual data cleaning and transformation processes, reducing time spent on data preparation by 20 hours per week and allowing team to focus on higher-value analytical work. Assisted in designing and conducting A/B testing framework for e-commerce platform, resulting in validation of three successful website optimisations that increased revenue by 12%. Supported creation of executive dashboards and ad-hoc reports using Excel and basic SQL queries, delivering insights to stakeholders on customer acquisition costs and product performance metrics.

EDUCATION

MSc Data Science

University of Cambridge

Cambridge, United Kingdom

2018

BSc Mathematics

Imperial College London

London, United Kingdom

2016
