PROFESSIONAL SUMMARY

Experienced Staff Engineer with 6 years of progressive responsibility in building and scaling backend systems and data infrastructure. Proven track record of designing high-performance solutions, mentoring engineering teams, and driving architectural improvements across complex distributed systems. Strong expertise in cloud technologies, data engineering, and modern DevOps practices with a focus on reliability and operational excellence.

WORK EXPERIENCE

Staff Engineer

Banco Sabadell, S.A.

Barcelona, Spain

<https://www.bancsabadell.com>

January 2022 - Present

Led the design and implementation of microservices architecture migration reducing API response times by 40% across 8 core banking services

Established engineering standards and code review practices for 12-person platform team, improving deployment frequency from monthly to weekly releases

Architected real-time transaction monitoring system processing 2.5 million events daily using Apache Kafka and Apache Flink

Mentored 4 junior and mid-level engineers on system design principles, resulting in 3 successful independent project launches

Senior Backend Engineer

CloudPeak Technologies Ltd

Barcelona, Spain

<https://www.cloudpeak.io>

March 2019 - December 2021

Implemented dbt transformation pipelines to automate data warehouse ETL processes, reducing manual data preparation time by 65%

Built and deployed containerized microservices using Docker and managed infrastructure with Kubernetes clusters hosting 50+ services

Designed distributed caching layer using Redis and Memcached reducing database load by 35% and improving query latencies from 800ms to 180ms

Developed comprehensive monitoring and alerting solution using Prometheus and Grafana tracking 200+ custom business metrics

Backend Engineer

Inditex Group

Arteixo, Spain

<https://www.inditex.com>

June 2018 - February 2019

Developed RESTful APIs in Java Spring Boot supporting 15 million daily requests across global e-commerce platform

Implemented GitHub Actions CI/CD pipelines automating build, test, and deployment processes for 6 core services

Optimized PostgreSQL query performance through indexing strategies and query rewrites, reducing P95 latencies by 45%

Collaborated with product and infrastructure teams to define API versioning strategy supporting 3 major platform versions simultaneously

EDUCATION

Bachelor of Science in Computer Science

Universitat Autònoma de Barcelona (UAB)

Barcelona, Spain

Graduated: June 2018

TECHNICAL SKILLS

Languages: Java, Python, Go, SQL, JavaScript

Data Engineering: Apache Spark, Apache Kafka, Apache Flink, Data Warehousing, ETL Pipeline Design

Cloud Platforms: AWS (EC2, S3, RDS, Lambda), Google Cloud Platform, Azure

DevOps and Infrastructure: Docker, Kubernetes, Terraform, ArgoCD, CI/CD Pipelines, Infrastructure as Code

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Tools and Frameworks: Spring Boot, Microservices Architecture, gRPC, Protocol Buffers, Git, Jira

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog

OTHER INFORMATION

Languages: Spanish (Native), Catalan (Native), English (Fluent)

Certifications: AWS Solutions Architect Associate (2021), Kubernetes Application Developer (2020)
