PROFESSIONAL SUMMARY

Data analyst with 3 years of progressive experience in business intelligence and analytics across fintech and e-commerce sectors. Skilled in transforming raw data into actionable insights using Python, SQL, and modern BI tools. Proven track record of improving data pipelines and delivering impactful dashboards to stakeholders. Seeking opportunities to expand expertise in advanced analytics and data engineering.

WORK EXPERIENCE

Data Analyst

Fintech Ventures Madrid

www.fintechventures.io

Madrid, Spain

March 2022 - Present

Developed and maintained 15+ interactive dashboards using Tableau and Power BI, improving executive visibility into KPIs and reducing reporting time by 40 percent

Optimized SQL queries across PostgreSQL and Snowflake databases, reducing query execution time by 35 percent and enhancing real-time analytics capabilities

Implemented automated ETL pipelines using dbt and Apache Airflow, enabling self-service analytics for 12 business teams and reducing manual data preparation by 50 percent

Collaborated with product and engineering teams to define data requirements and deliver weekly analytics reports tracking user acquisition, retention, and monetization metrics

Business Intelligence Analyst

DataCore Solutions (Previously known as Analytics Hub Europa)

www.datacore-solutions.com

Madrid, Spain

June 2021 - February 2022

Created 8 new key business metrics and dashboards using Python pandas and Tableau, enabling data-driven decision making across marketing and sales departments

Designed and executed SQL queries on large datasets to identify trends in customer behavior, resulting in 3 actionable business recommendations

Built automated reporting workflows in Excel VBA and Power Query, reducing manual report generation time from 8 hours to 1 hour per week

Documented data models and created training materials for 10 non-technical stakeholders to improve data literacy across the organization

Junior Data Analyst

E-commerce Iberia Group

www.ecommerceiberia.com

Madrid, Spain

September 2020 - May 2021

Extracted and analyzed transactional data using SQL Server and created monthly performance reports for 8 product lines, identifying revenue growth opportunities worth 250k euros annually

Built predictive models using HuggingFace Transformers and scikit-learn to forecast customer churn with 82 percent accuracy, enabling targeted retention campaigns

Automated routine data validation and quality checks using GitHub Actions and Python scripts, reducing data errors by 45 percent and improving reporting reliability

Supported the migration of legacy reporting systems to cloud-based infrastructure on AWS, documenting processes and training 6 team members on new tools and procedures

EDUCATION

Master's Degree in Business Intelligence and Data Analytics

Universidad Autónoma de Madrid (UAM)

Madrid, Spain

Graduated: June 2020

GPA: 3.7/4.0

Bachelor's Degree in Statistics

Universidad Carlos III de Madrid (UC3M)

Madrid, Spain

Graduated: June 2019

GPA: 3.6/4.0

TECHNICAL SKILLS

Languages: Python, SQL, R, VBA, DAX

Databases: PostgreSQL, Snowflake, SQL Server, MongoDB, MySQL

Business Intelligence: Tableau, Power BI, Looker, Google Data Studio

Data Engineering: dbt, Apache Airflow, Pandas, NumPy, Apache Spark

Cloud Platforms: AWS (S3, EC2, RDS), Google Cloud Platform, Azure Data Factory

Machine Learning: scikit-learn, HuggingFace Transformers, TensorFlow, XGBoost

Version Control: Git, GitHub, GitLab

Other Tools: Excel (advanced), Jira, Confluence, Jupyter Notebooks, Docker

PUBLIC REPOSITORIES

github.com/crivera-madrid/customer-churn-prediction

Predictive model for e-commerce customer churn using gradient boosting and feature engineering. Python, scikit-learn, Pandas.

github.com/crivera-madrid/etl-pipeline-airflow

Complete ETL pipeline orchestration example with Apache Airflow, dbt, and PostgreSQL integration for analytics workflows.

github.com/crivera-madrid/tableau-dashboard-templates

Collection of reusable Tableau dashboard templates and calculated field examples for common business metrics.

github.com/crivera-madrid/sql-performance-optimization

Repository documenting SQL optimization techniques and benchmarks for large dataset queries in PostgreSQL and Snowflake.
