PROFESSIONAL SUMMARY

Experienced Full Stack Engineer with 12 years of progressive expertise in designing, developing, and deploying scalable web applications across multiple technology stacks. Proven track record of leading technical initiatives, mentoring junior engineers, and delivering high-impact solutions in fast-paced environments. Specialising in cloud-native architecture, microservices design, and cross-functional collaboration to drive business outcomes and technical excellence.

WORK EXPERIENCE

Senior Full Stack Engineer

DataFlow Systems Ltd

<https://www.dataflowsystems.io>

Cambridge, United Kingdom

March 2021 - Present

Architected and implemented microservices-based platform serving over 2 million daily active users, utilising Node.js, Python, and PostgreSQL across distributed cloud infrastructure on AWS.

Led migration of monolithic application to event-driven architecture using Apache Kafka, reducing system latency by 40 percent and improving throughput capacity significantly.

Established comprehensive CI/CD pipelines using GitHub Actions and automated testing frameworks, reducing deployment time from 2 hours to 15 minutes while maintaining 99.9 percent uptime.

Mentored team of 6 junior and mid-level engineers through code reviews, architectural discussions, and technical training sessions, promoting best practices and knowledge sharing across the organisation.

Staff Engineer

Quantum Analytics plc

<https://www.quantum-analytics.co.uk>

Cambridge, United Kingdom

June 2018 - February 2021

Designed and developed full-stack data analytics platform using React, Node.js, and Apache Spark, enabling real-time insights for enterprise clients across financial services and retail sectors.

Implemented LangChain-based natural language processing features to enhance user query capabilities and search functionality, improving user experience and engagement metrics.

Optimised database performance by implementing advanced indexing strategies and query optimisation techniques, reducing average query response times from 8 seconds to 1.2 seconds.

Drove adoption of test-driven development practices, increasing code coverage from 45 percent to 87 percent and reducing production defects by 60 percent over 18 months.

Senior Developer

TechVenture Solutions

<https://www.techventure.net>

London, United Kingdom

August 2012 - May 2018

Developed full-stack web applications using Java Spring Boot, Angular, and MySQL, delivering features for e-commerce and SaaS platforms serving hundreds of thousands of users.

Introduced dbt data transformation framework to streamline ETL processes and improve data warehouse maintainability for analytics teams, reducing manual data pipeline maintenance by 50 percent.

Collaborated with product and design teams to implement responsive front-end interfaces and RESTful backend APIs, ensuring seamless user experiences across web and mobile platforms.

Managed deployment infrastructure on AWS EC2 instances, configuring security groups, load balancing, and implementing disaster recovery procedures to maintain business continuity.

EDUCATION

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

Graduated: 2012

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, TypeScript, SQL

Frontend: React, Angular, HTML5, CSS3, Redux, Vue.js

Backend: Node.js, Spring Boot, Express.js, Django, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Cloud Platforms: AWS (EC2, S3, RDS, Lambda), Google Cloud Platform, Microsoft Azure

DevOps and Infrastructure: Kubernetes, Terraform, ArgoCD, Docker, Jenkins

Data Technologies: Apache Kafka, Apache Spark, Elasticsearch, Kibana

Testing: Jest, Mocha, Pytest, JUnit, Selenium

Version Control: Git, GitHub, GitLab, Bitbucket

Methodologies: Agile, Scrum, Test-Driven Development, Pair Programming
