PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff Engineer with a proven track record of spearheading cutting-edge technological initiatives that deliver actionable insights and drive organisational objectives. Passionate about leveraging cross-functional collaboration to champion mission-critical infrastructure solutions while synergistically optimizing data-driven decision making. Dedicated to fostering innovative approaches that enable dynamic value creation through strategic thinking and proven execution excellence. Deeply committed to advancing organisational success through transformative technical leadership.

WORK EXPERIENCE

Senior Software Engineer

TechVision Solutions

<https://techvision.io>

Madrid, Spain

January 2022 - Present

Architected and deployed microservices infrastructure handling 2 million daily requests across EU regions, reducing latency by 40% through innovative containerization strategies

Led a cross-functional team of 45 senior engineers and architects, establishing technical standards and governance frameworks that improved code quality metrics by 35%

Designed and implemented real-time data processing pipelines using Kafka and Spark, enabling predictive analytics capabilities for enterprise clients

Mentored 12 junior developers through structured technical development programs, with 8 promoted to senior roles within 18 months

Software Engineer (Junior)

CloudBase Infrastructure

<https://cloudbase.net>

Madrid, Spain

March 2020 - December 2021

Managed distributed team of 28 engineers responsible for critical payment processing systems handling 500 million euros monthly transaction volume

Developed REST APIs and microservices using Node.js and Python, contributing to 15% improvement in system throughput and reliability

Implemented CI/CD pipelines using Jenkins and GitLab, reducing deployment times from 4 hours to 12 minutes through automation

Created comprehensive technical documentation and runbooks for legacy system migration affecting 50+ dependent applications

Graduate Developer

Digital Innovation Hub

<https://diginnovation.co>

Barcelona, Spain

June 2018 - February 2020

Independently architected enterprise-wide cloud migration strategy moving 200+ applications to AWS, managing cross-company coordination and technical implementation

Optimized database queries and indexes resulting in 60% performance improvement across transactional systems

Developed full-stack applications using React, Node.js, and PostgreSQL deployed to production serving 100,000+ concurrent users

Spearheaded implementation of automated testing framework achieving 85% code coverage and reducing production incidents by 50%

EDUCATION

Degree in Computer Science

Universidad Politecnica de Madrid (UPM)

Madrid, Spain

Graduated: June 2018

GPA: 3.7/4.0

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, Go, SQL

Cloud Platforms: AWS, Google Cloud Platform, Azure

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch, DynamoDB

Message Queues: Kafka, RabbitMQ, AWS SQS

Container and Orchestration: Docker, Kubernetes, Docker Swarm

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Web Frameworks: Express.js, Django, Spring Boot, FastAPI

Version Control: Git, GitHub, GitLab

Agile Methodologies: Scrum, Kanban, SAFe

GITHUB REPOSITORIES

github.com/carlosmendezgarcia/kubernetes-deployment-automation

Comprehensive Kubernetes deployment and orchestration framework with Helm charts and automated scaling policies

github.com/carlosmendezgarcia/distributed-cache-system

High-performance distributed caching solution using Go and Redis with consistent hashing

github.com/carlosmendezgarcia/microservices-monitoring-stack

Complete monitoring and observability stack using Prometheus, Grafana, and ELK with Kubernetes integration

github.com/carlosmendezgarcia/data-pipeline-analytics

Real-time Apache Kafka and Spark data processing pipeline for ETL operations and analytics
