Location: Paris, France

PROFESSIONAL SUMMARY

Results-driven and highly motivated data engineering professional with a proven track record of spearheading cutting-edge solutions across mission-critical enterprise environments. Passionate about leveraging innovative technologies to deliver actionable insights and champion data-driven decision making through cross-functional collaboration. Demonstrated expertise in architecting scalable data infrastructure that synergistically aligns with organisational objectives while enabling transformative digital initiatives. Committed to driving organisational value through dynamic problem-solving and the delivery of high-impact analytics platforms.

WORK EXPERIENCE

Senior Data Engineer

DataFlow Solutions

<https://www.dataflowsolutions.io>

Paris, France

March 2021 - Present

- Architected and deployed a cloud-native data platform processing 2.5TB of daily data using Apache Spark and Kubernetes, reducing query latencies by 65% and supporting 150+ concurrent users across the organisation
- Led the migration from legacy batch processes to event-driven architecture using Apache Kafka and dbt, implementing continuous data quality monitoring that decreased data incidents by 78%
- Designed and implemented a modern data lakehouse using Delta Lake and Apache Iceberg, enabling real-time analytics capabilities and reducing time-to-insight from 24 hours to under 5 minutes
- Mentored a team of 4 junior data engineers, establishing best practices for data modelling, CI/CD pipelines using GitHub Actions, and code review processes that improved deployment frequency from bi-weekly to daily releases

Data Engineer

Nexus Analytics

<https://nexus-analytics.net>

Lyon, France

July 2018 - February 2021

- Developed and maintained ETL pipelines using Python and Apache Airflow, processing data from 8 disparate sources and serving 25+ downstream analytics teams with SLA uptime of 99.8%
- Implemented HuggingFace Transformers-based NLP pipeline for automated customer sentiment analysis, achieving 94% accuracy and informing product decisions for 3 major feature releases
- Optimised PostgreSQL and Elasticsearch clusters handling 500GB of data, implementing strategic indexing and partitioning that reduced average query response time from 8 seconds to 1.2 seconds
- Built comprehensive monitoring and alerting infrastructure using Prometheus and Grafana, creating 45 custom dashboards that provided real-time visibility into data pipeline health and system performance

Data Engineer

TechCore Systems

<https://www.techcore.co>

Paris, France

September 2017 - June 2018

- Engineered automated data collection pipelines using Python and SQL to consolidate data from multiple marketing platforms, enabling self-service analytics for 12 business units
- Optimised dbt transformation workflows to reduce nightly batch processing time from 6 hours to 45 minutes, improving data freshness for morning reporting cycles
- Developed data quality frameworks and validation scripts that identified and flagged 2000+ data anomalies monthly, reducing downstream analytical errors by 72%
- Collaborated with Business Intelligence team to design and implement dimensional data models supporting 8 major dashboards used by executive leadership for strategic planning

EDUCATION

Master of Science in Computer Science, Data Engineering Specialisation

INSA Lyon (Institut National des Sciences Appliquees)

Lyon, France

September 2015 - June 2017

Bachelor of Science in Computer Science

Universite Pierre et Marie Curie

Paris, France

September 2012 - June 2015

TECHNICAL SKILLS

Data Processing and Warehousing: Apache Spark, Apache Airflow, Snowflake, BigQuery, PostgreSQL, Delta Lake, Apache Iceberg

Programming Languages: Python, SQL, Java, Scala

Cloud Platforms: Google Cloud Platform (GCP), Amazon Web Services (AWS), Microsoft Azure

Data Technologies: Apache Kafka, Apache Flink, Elasticsearch, Redis

Analytics and BI: dbt, Tableau, Looker, Grafana

Data Quality: Great Expectations, Custom Python frameworks

Version Control and DevOps: Git, Docker, Kubernetes, GitHub Actions

Machine Learning Frameworks: HuggingFace Transformers, TensorFlow, scikit-learn

CERTIFICATIONS

AWS Certified Data Analytics Specialty

Google Cloud Professional Data Engineer

Certified Kubernetes Application Developer (CKAD)

LANGUAGES

French (Native)

English (Fluent)
