PROFESSIONAL SUMMARY

Accomplished Principal Engineer with 7 years of progressive experience in cloud architecture, distributed systems, and enterprise infrastructure. Proven track record of designing and implementing large-scale solutions that drive business value and operational excellence. Skilled in leading cross-functional teams and mentoring junior engineers while maintaining hands-on technical expertise. Passionate about building resilient systems and fostering innovation within engineering organisations.

WORK EXPERIENCE

Principal Engineer

Synapse Data Ltd

synapsedatacompany.io

Birmingham, United Kingdom

January 2023 - Present

Led architecture decisions for 45-person engineering department overseeing £12M annual budget and strategic technical roadmap

Designed microservices migration strategy reducing infrastructure costs by 35% and improving deployment frequency to daily releases

Established enterprise-wide cloud governance framework and security policies achieving ISO 27001 compliance

Mentored 8 senior engineers and conducted technical interviews that improved hiring quality by 40%

Senior Systems Engineer

Deloitte Consulting LLP

www.deloitte.com

London, United Kingdom

June 2021 - December 2022

Architected Kubernetes infrastructure supporting 200+ containerised applications across multi-cloud environments for Fortune 500 clients

Implemented infrastructure-as-code using Terraform reducing manual provisioning time by 80% across 15 enterprise clients

Designed disaster recovery and business continuity strategies achieving 99.99% uptime SLA for critical systems

Collaborated with client leadership teams to translate business requirements into technical solutions resulting in 5 major contract renewals

Graduate Software Engineer

BAE Systems Applied Intelligence

www.baesystems.com

Bristol, United Kingdom

August 2019 - May 2021

Developed and maintained Python-based data processing pipelines handling 50GB daily data ingestion for defence sector clients

Implemented CI/CD automation using Jenkins reducing deployment time from 4 hours to 15 minutes

Contributed to microservices architecture redesign improving system scalability and reducing latency by 45%

Participated in security code reviews and threat modelling exercises ensuring OWASP compliance across applications

EDUCATION

Bachelor of Science in Computer Science

University of Birmingham

Birmingham, United Kingdom

Graduated: June 2019

Grade: Upper Second Class Honours (2:1)

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container Orchestration: Kubernetes, Docker, Helm

Infrastructure as Code: Terraform, CloudFormation, Ansible

Programming Languages: Python, Go, Java, Bash

Databases: PostgreSQL, MongoDB, Redis, DynamoDB

DevOps Tools: Jenkins, GitLab CI/CD, ArgoCD, Prometheus, ELK Stack

Networking: TCP/IP, DNS, load balancing, VPC architecture

Methodologies: Agile, Scrum, system design, microservices architecture

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

Kubernetes Application Developer (CKAD)

HashiCorp Certified: Terraform Associate
