PROFESSIONAL SUMMARY

Results-driven BI Analyst with 1 year of hands-on experience in data analysis, reporting, and business intelligence solutions. Proficient in SQL, Python, and Power BI with a strong foundation in extracting actionable insights from complex datasets. Seeking to leverage technical skills and analytical mindset to drive data-informed decision-making in a dynamic organization.

WORK EXPERIENCE

Junior BI Analyst

Synapse Data Ltd

Barcelona, Spain

synapsedataltd.io

November 2023 - Present

Developed and maintained interactive Power BI dashboards for executive stakeholders, reducing report generation time by 40 percent through automation

Wrote complex SQL queries to extract and transform data from relational databases, supporting ad-hoc analysis requests for 5+ business departments

Conducted data quality audits and implemented validation procedures, identifying and correcting discrepancies affecting 15,000+ records

Collaborated with product and finance teams to define KPIs and establish baseline metrics for quarterly business reviews

BI Analyst Intern

BBVA

Barcelona, Spain

www.bbva.es

June 2023 - January 2024

Created financial performance reports using Power BI and Excel, presenting insights to management on revenue trends and cost optimization opportunities

Assisted in designing a data warehouse schema that improved query performance by 35 percent for customer analytics

Performed ETL operations using Python and SQL to consolidate data from multiple source systems into a centralized repository

Supported the transition of legacy reporting systems to cloud-based solutions on Azure, documenting processes and training end-users

Data Analytics Assistant

Banco Sabadell

Barcelona, Spain

www.bancsabadell.com

April 2023 - September 2023

Analyzed customer segmentation data and prepared visualization reports to support marketing campaign planning and targeting strategies

Assisted in building predictive models using Python libraries such as Pandas and Scikit-learn to forecast customer churn

Maintained documentation and performed routine database maintenance tasks on SQL Server instances

Participated in weekly knowledge-sharing sessions and completed internal training modules on advanced analytics methodologies
