Location: Glasgow, United Kingdom

PROFESSIONAL SUMMARY

I am a Staff Software Engineer with 12 years of experience building scalable distributed systems and leading high-performance engineering teams. My career has focused on designing robust backend architectures, mentoring junior developers, and driving technical excellence across complex codebases. I'm passionate about clean code, system design, and fostering collaborative engineering cultures that deliver measurable business impact.

WORK EXPERIENCE

Senior Software Engineer

TechVision Solutions Ltd

<https://www.techvisionsolutions.io>

Glasgow, United Kingdom

January 2022 - Present

Led the architecture and implementation of a microservices migration project reducing system latency by 45 percent

Directed and managed a cross-functional team of 24 software engineers across three geographic locations

Established code review standards and automated testing frameworks that improved deployment frequency to 50 times daily

Mentored 8 junior engineers and promoted 3 to mid-level positions through structured coaching and knowledge transfer

Graduate Software Engineer

DataCore Systems

<https://www.datacore-systems.net>

Edinburgh, United Kingdom

June 2020 - December 2021

Developed RESTful APIs and microservices handling 2 million requests per day using Node.js and Python

Managed and optimized PostgreSQL databases serving critical production workloads for enterprise clients

Implemented CI/CD pipelines using Jenkins and Docker reducing deployment time from 4 hours to 15 minutes

Oversaw the restructuring of the entire data engineering department consisting of 35 analysts and engineers

Junior Software Engineer

CloudForge Technologies

<https://www.cloudforge.co>

Manchester, United Kingdom

September 2012 - May 2020

Built and maintained full-stack web applications using React, Node.js and MongoDB for SaaS platform serving 50,000 users

Automated infrastructure deployment processes using Terraform and AWS CloudFormation reducing manual work by 80 percent

Collaborated with product and design teams to implement responsive user interfaces and improve application performance metrics

Architected and led the company's enterprise system redesign project managing technical decisions for 200 concurrent users

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2012

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, Go, SQL

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch, DynamoDB

Cloud Platforms: AWS, Google Cloud Platform, Azure

Backend Frameworks: Node.js, Django, Spring Boot, FastAPI

Frontend: React, Vue.js, HTML5, CSS3

DevOps and Tools: Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Git

Architecture: Microservices, Distributed Systems, Event-Driven Architecture, RESTful APIs

Methodologies: Agile, Scrum, Test-Driven Development
